○ COOLANT READY TO USE

- Ensures rapid heat exchange with excellent heat transfer, hence optimum engine cooling and longer engine life.
- The corrosion inhibitors protect the interior surfaces of the radiators from rust and corrosion.
- Lower viscosity ensures lower pumping requirements.
- Maple Blue coolant can be used for all types of vehicles (Indian, Japanese, American, European and Korean cars).
- It is Desirable to Flush The Cooling System with Water And Cooling System Cleaner Before Changing With maple Radiator Coolant.
- Density/Conditions: 1.05 G/Cm³ / At 20° C, Chemical Basis Ethylene Glycol, Colour: Blue.

[1261]	[20]

GLASS COATING

AVAILABLE
30ML

PART NO. 1262

Unlike traditional waxes and sealants that temporally "cover the surface," Glass Coat chemically reacts with hydrogen and oxygen on the surface of the clearcoat. The end result is an extremely tough and durable ceramic film which protects your vehicle's paint.

GRAPHENE COATING

AVAILABLE
50ML

PART NO. 1263

Graphene coatings are ultra - hard and anti - static which coated on a vehicle doesn't allow the dust and dirt to settle down.

CERAMIC COATING 9H

AVAILABLE
30ML/50ML

PART NO. 1264

Ceramic coating offers good protection to the car's surface. The nano - coating can protect the car from most scratches, dirt and chemical contaminants. Ceramic coating also doesn't have any side - effects to the original paint.
