Properties

- Exterior Compact Laminates as the name suggests is the ideal product for exterior applications made from Kraft and decorative paper. High UV resistance which makes it ideal for exterior and cladding facades.
- HPL, available in the sizes of the length of 8 feet, width of 4 feet & the thickness of 6mm with different color.

Durability:

- Compared to other decorative materials like paints, thermoplastic foils, veneers etc. HPL offer a significantly longer life time.
- HPL are difficult to ignite and have properties that retard spread of flame. In a fire situation they do not soften or release burning droplets.
- Resistance to staining.
- Resistance to chemical attack.
- Resistance to UV light.
- Resistance to artificial weathering.
- Resistance to scratching.
- Resistance to abrasion.

Applications of HPL

- - Exterior Wall Cladding
- - Airports
- - Fences Rails and Screens
- - Louvers Signage
- - Roof Cladding
- - Window Panels
- - Pedestrian Shelters
- - Garage
- - Kiosk
- - Roof Cladding

Facade

Gates

Balcony

Easy to clean

Solvent resistant

Impact resistant

Double hardened

Scratch resistant

Easy to install

Waterproof against Rain

Improves sound insulation

Improves reaction against Fire

Optimal light-fastness

Benefits of HPL

Decorative –

- High Weather resistance –
- Optimal light fastness –
- Scratch & Solvent resistance –
- Easy to maintain –
- Heat & Fire resistance –
- Free from heavy metals –
- Sustainability –
- Low cost maintenance –
- Decreases air conditioning costs –
- Self supporting & Impact resistance –
- Easy rapid installation & repair procedure –
- Increased sound proofing function (upto 15Db) –
- Provides wall protection and heat insulation against atmospheric precipitation
