"ALL WE HAD
WAS AN IDEA"

“

IDEA AND EXPERIENCE
WILL NEVER COINCIDE
IN THE CENTER; ONLY
THROUGH ART AND
ACTION ARE THEY
UNITED.

- JOHANN WOLFGANG VON
GOETHE

”

It all started with the idea of constantly enhancing our products and services to meet the ever-changing market dynamics at the packaging front. While we were a profitable packaging business, we always aspired to get into a space that was constantly evolving and had a futuristic reach. The packaging industry had a standardized structure where the solutions were basic, and the customization factor was rare or missing. Over the last decade, we developed a strong research team resulting in an array of unconventional and creative products that reigns supreme over our competitions. With our domain expertise and a proficient team backing us up, we emerged as dominant players in the market for delivery, innovation and complete client contentment.

Today, GELID® is the go-to brand when it comes to tailored and standard packaging for Pharmaceuticals, Clinical Research and Perishable food items. These industries depend heavily on reliable packaging as they are transported under recommended conditions or varying temperatures and we have been delivering it immaculately. In our pursuit of achieving new heights, we built a business that is an amalgamation of excellence and profound client satisfaction.

Our mission is to make GELID® the preferred partner for your needs by delivering outstanding value, continuous innovation and exceptional product.

“ WE BELIEVE IN RESPONSIBLE INDUSTRY LEADERSHIP, CREATING PROFITABLE GROWTH IN HARMONY WITH ENVIRONMENTAL SUSTAINABILITY AND GOOD CORPORATE CITIZENSHIP. ”

VISION

To evolve as a market leader in providing innovative Cold Chain Logistic & Protective Packaging solutions that are affordable and best in the industry.

COLD CHAIN

1. GELID® - Gel Ice Pack

Gel Ice Pack by GELID® is a practical and effective refrigerant used for the shipping of perishable products that need to be frozen or kept under certain cold temperatures. GELID® eutectic Gel Ice Pack comes in forms of Coolant LDPE & HDPE Hard Bottles.

The eutectic Gel Ice Packs contain well-researched, highly effective state of the art refrigerant gel. It effectively keeps the contents of the insulated shipping containers cold or frozen without the watery mess or the hazards that come with the use of dry ice.

The eutectic Gel being used is blended with the most qualitative PCM (Phase Change Material) usually non-toxic, can absorb a considerable amount of heat, making our cool packs the most effective way for temperature control.

Following sizes are available for Gel-Ice Pack (LDPE)

Weight (gms)	Size (mm)
650	175 X 280
450	230 X 150
250	150 X 150
200	115 X 150
150	115 X 150
100	80X150
40	55X110

Gel Pack (HDPE – Hard Bottle)

Weight (gms)	Size (mm)
120	85 X 85 X 20
300	205 X 90 X 23
325	168 X 90 X 22
380	163 X 94 X 34
450	155 X 110 X 32
415	185 X 102 X 25
500	210 X 80 X 35
600	218 X 145 X 25
4500	325 X 285 X 59

COLD CHAIN

GELID® Foam Brick

One of our innovative products, the semi-stiff Foam Brick never alters its shape or form during refrigeration even in transit and maintains long-lasting cold temperature. These foam bricks are tough, durable and come with recyclable polyethylene wrapper with heat-welded seams that ensure maximum resistance to leakage, puncture, tears and splitting. The foam brick pack features a consistent, uniform structure and a non-toxic, non-caustic composition. This product is ideal for lining square and rectangular shipping containers.

This non-hazardous and bio-friendly product is economical, reusable and comes in various shapes and sizes that can be customized as per the requirements.

Foam Brick

Weight (gms)	Size (mm)
600	145 X 108 X 35
200	100 X 88 X 14
100	105 X 55 X 17

3. GELID® - Expanded Polystyrene (EPS) Ice Boxes

EPS (popularly known as Thermocol) is an aromatic polymer made from monomer styrene, a liquid petrochemical. Products made from EPS are ubiquitous, useful in protective packaging and at the same time efficient in providing packaging where there is a need to maintain a specific temperature level to keep products in their original condition. It is inexpensive, lightweight and the most convenient to satisfy packaging requirements.

The EPS icebox finds its applications as storage box for various industries and so far is one of the most sought after and reliable product. We offer EPS boxes in an extensive range of size, design, shape and capacity that our clients can avail as per their product specifications and needs.

COLD CHAIN

Below mentioned are the automatic machine molded boxes readily available with us.

4. GELID® - Insulated Boxes

One of our signature and widely accepted prodigy, these customized boxes and bags are ideally used for delivery, transportation and distribution in various industries like Hot Food Items, Milk and other related products to name a few. Excellent temperature retention, customization and branding are unique characteristics of the product.

The premium quality PUF Insulated Boxes are manufactured under the supervision of practiced experts, who use the advanced technology and superior-grade material which ensure enhanced durability and performance.

COLD CHAIN

Made from approved grades of polyethylene materials in double-wall construction by a unique molding process with superior grade fittings and hardware, it is 100% hygienic, durable, leak-proof, rustproof and corrosion-free.

There is a built-in space to print the message logo or brand name and this product is available in various sizes and elegant colors.

COLD CHAIN

5. GELID® - Insulated Carry bags

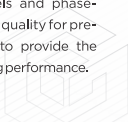

The Double-zip top opening makes for easy and convenient packing. This product is reusable, lightweight and insulated on all sides with reflective liner. It also comes with an external utility pocket.

6. GELID® - Temperature Controlled Boxes

These are reusable containers that are designed for the distribution, transportation and storage of goods in Cold Chain distribution.

To meet the industry's stringent requirements, we use insulated boxes/panels and phase-change ice packs of surpassing quality for pre-qualified cold chain shippers to provide the contentment of uncompromising performance.

COLD CHAIN

7.GELID® - Vaccine Carriers

Vaccine carriers are insulated containers that are lined with coolant packs to keep vaccines and diluents cold throughout transportation for short storage periods. These are used to store vaccine products at a controlled, stable temperature and provide a means of storing vaccines and supplies. These Vaccine Carriers are stackable with re-enforced walls that are tested rigorously confirming to WHO norms.

Vaccine Carriers are proven products when it comes to storage and transportation of products like blood packets, ampoules and medicines where maintaining temperature is a critical factor.

Made from food-grade approved Polyethylene, The light weighted and durable material offers easier and safer handling.

Type	VCO .89	VC 8
------	---------	------

Capacity (in liter)	0.89	8

Vaccine Storage Dimension (in mm)	99 x 91 x 165	365 x 220 x 220
No of Ice Packs	4	32

In addition to above, we offer Vaccine Carriers in other capacities as well like **1.5, 21 & 6 Liters.**

COLD CHAIN

8. GELID® - Pallet Covers

Pallet Covers are typically used for provisional and short-term storage to cover equipment on a pallet and are a cost-effective choice to a tarp. GELID® Pallet Covers are perfect for all kinds of light, medium and heavy usage. Big Pallet Covers can also be used to line a drum, bin or to cover a pallet. The Pallet is perforated on a roll for easy dispensing and is re-usable and recyclable. Generally, the Pallet covers will cover your substance as a dust guard for years in a controlled atmosphere.

PALLET COVERS protect goods from any temperature variation, unwanted material, prevent dust and other contaminants from spoiling goods and naturally repel water.

COLD CHAIN

8.1. Thermal/Insulated Pallet Covers

Our thermal/insulated pallet covers are designed to protect temperature-sensitive goods such as food & drink and pharmaceuticals. Water and puncture-resistant, they are extremely hard-wearing, maintain the temperature of the goods and protect them during storage and transportation. By simply covering the pallet with the thermal/insulated pallet covers and securing it with the Velcro straps, double sided tapes etc it creates an effective outer thermal/insulated protection for a wide range of products.

COLD CHAIN

8.2. LARGE GUSSETED BAGS

- Pre-cut gusseted bags are ideal for use as container liners or pallet and machinery covers.
- Perforated on a roll for easy dispensing. Linear low density poly.
- Bags work well as Gaylord liners.

8.3. HEAVY DUTY PALLET COVERS

8.4. BLACK PALLET COVERS

8.5. COOL SHIELD BUBBLE ROLLS AND PALLET COVERS

Create custom thermal packaging for food, plants and medical shipments.

- Effective moisture and vapour barrier.
- 3/16" metalized bubble cushions and protects.

COLD CHAIN

9. GELID® - VIP Cold Chain Boxes

GELID® VIP (Vacuum Insulated Panels) cold chain box maintains a flawlessly stable internal temperature for extensive hours, even in extreme conditions. It is heavily reliable compared to other traditional insulated packaging solutions.

This is ideal for transporting medical specimen and other temperature responsive products. The VIP cold chain box is ideally the most consistent insulation medium for non-refrigerated transport.

10. GELID® - Data Logger Single & Multi Use

Data loggers are used for recording temperature and moisture data that are ultimate for a large array of assessment and

COLD CHAIN

measurement for quality control and environmental supervision applications. These devices easily generate a report on the completion of data logging.

We offer pre-programmed and user-programmable Data Logger devices for single and multiuse purposes. Our data loggers have long serviceable life and come with an efficient battery and built-in USB connector. The devices are entirely user-programmable with language selection, sampling interval, start delay, alarm delay, temperature units, alarm range & type with no software or driver mandatory for setup or downloading the data.

SOLUTIONS.

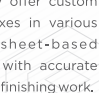

PROTECTIVE PACKAGING

1. Expanded Polystyrene (EPS) Boxes

EPS (Popularly Known as Thermocol) box for storing sensitive & fragile items is made of using supreme molding technology; this packaging material is recognized for having excellent dimensional & structural meticulousness. It not only shields from impact or load but also avoids thermal degradation of sensitive materials.

We also offer EPS boxes as per the custom needs of our clients, these custom need boxes are prepared by panels assortments, fabrication/scooping methodology to cope up with the cost-effectiveness of the requirements. We profoundly offer custom size fabricated/scooping boxes in various shapes, sizes and even sheet-based cutting/pasting & scooping with accurate specifications and satisfactory finishing work.

PROTECTIVE PACKAGING

2. Gap Filler – Peanut

When it comes to packing up your possessions for a shift or packing your parcels, you'll need to be sure to opt for the right packing products for the trade. GELID® Lightweight Void Fillers are prepared using EPS and due to its excellent insulation property, do not readily absorb moisture. Our Gap fills are most appropriate for packing fragile items like Glass, Crockery, Porcelain, Electronics, cold chain packaging and delicate handicraft items to name a few.

Its interlocking structure helps in keeping the product intact and in its place, thus resisting shock impact & avoiding breakage to the product.

PROTECTIVE PACKAGING

3. Expanded Polyethylene (EPE) Foam Sheet

EPE is a closed-cell, flexible, non-cross-linked Polyethylene insulation manufactured from low-density Polyethylene as a base material. EPE foam sheet rolls are used for packaging of all items without causing damage and are enormously dependable as they are made from the finest quality of raw materials.

These foam sheets can also be used for upholstery work and packaging material. EPE is weatherproof and immaculate in absorbing shock and offers no or minimal effect of any kind of acids.

We offer premium quality, water resistance and highly versatile and crack/tear-resistant sheets in various thicknesses.

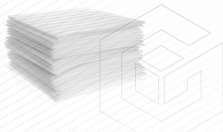

PROTECTIVE PACKAGING

4. Expanded Polyethylene (EPE) Box

We offer highly flexible fabricated EPE foam box with good compressive strength. EPE Boxes come with great electrical & thermal insulation properties and are tear resistance. This product can be used in providing protective packing for delicate articles or goods such as glasses, furniture, tabletops.

5. Expanded Polyethylene (EPE) Bag

Our high-quality EPE Foam Bag with double-sided tape adhesive is used for the packaging of electronics, cosmetics, laboratory apparatus, imitation jewelry and confectionery items. We offer this product in various thicknesses and specifications to meet the customization requirement.

PROTECTIVE PACKAGING

6. Expanded Polyethylene (EPE) Gap Fill

In order to process high-quality EPE Chips, our professionals employ advanced machines and utilize quality tested polyethylene procured from authentic vendors. This biodegradable and highly shock-absorbent EPE gap fills can be reused countless times.

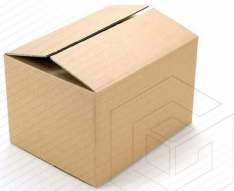

This product is suitable for filling the gaps of packaging items of irregular shapes, materials like statues and machine parts to avoid damage. With this economical product, it is possible to fill large spaces as the product is lightweight and offers extremely suitable cushioning.

PROTECTIVE PACKAGING

7. Corrugated Box

At GELID®, we are market leaders in providing excellent quality Corrugated Boxes which are strong, sturdy, durable and ideal for protective packaging. Premier quality material combinations are used in the manufacturing of these corrugated boxes to ensure optimum results, considering all parameters viz., a number of ply, Flute type, GSM, BF, BS, ECT, Cobb Value, and Stacking Strength. These are specifically used for packing without impeding the quality of the article being packed.

PROTECTIVE PACKAGING

8. Corrugated Rolls

We are engaged in offering our clients a range of excellent quality Corrugated Rolls. The rolls are crafted by our professionals using supreme grade raw materials and advanced technology. These rolls are well-known for their features like sturdiness, fine finish, lightweight and durability. The offered rolls are extensively demanded in various industries like automobile, printing, packaging, chemicals, logistic, etc.

9. Corrugated Sheet

Owing to our proficiency in this domain, we are offering a wide gamut of Corrugated Sheets. These sheets are cherished for the perfect finish, moisture resistance, smooth texture and durability. The offered sheets are extensively used for the transportation of various kinds of material in different industries.

PROTECTIVE PACKAGING

We offer these highly durable sheets in different finishes and sizes as per the requirements and specific needs.

10. Air Bubble Envelope

This product is made using optimum quality raw materials and sophisticated technology in accordance with the standards which attracts the clients the most. This tear-proof, easy to carry, moisture resistance, long-lasting and lightweight product is available in different thickness and customizable sizes.

11. Air Bubble Sheet

In synchronization with the set industry standards, the Air Bubble sheet provided by us manufactured at vendor's end using high-grade basic material and latest technology. These high strength, tear-resistance sheets are available in different thicknesses, GSM and gauge. Moreover, to ensure the best quality, the offered sheets tested by our quality experts on different parameters.

PROTECTIVE PACKAGING

12. Air Bubble Bag / Roll

Packaging Air Bubble material is shielding, cushion protective material which is manufactured by using high-quality plastic. These rolls/bags have air pockets layering the surface that acts as an anti-damage guard for packed material. These products are extremely cherished for their high potency, faultless finish, tear and temperature resistance, lightweight, elasticity and sturdiness.

Air Bubble customized Bags are made with superior quality air bubble sheets extensively used for the packaging of all breakable equipment like computers, crockery, glass-based products, household materials and other breakable or fragile products. It can also be used to cushion medium to heavyweight products in various industries.

PROTECTIVE PACKAGING

GELID® Air Bubble roll is made of mono, two layers or multilayer of LDPE sheets. The air is entrapped between two layers to give excellent cushioning. The air bubble film is available in roll form in varying lengths, width and gauge.

The Air Bubble rolls, sheets and bags are extensively used for packaging purposes by many industries like pharma, logistics, manufacturing, ceramics, electronics, electrical crockery, etc. for ensuring the safety of their packed matter.

13. Self Adhesive BOPP Tapes

Self Adhesive BOPP tapes or Printed Packaging tapes are widely used in industries for varied packaging applications. With high-quality adhesives, this product can uphold difficult weather conditions. Also, BOPP tapes are robust, tamper-proof and presented in various sizes as well as thickness.

PROTECTIVE PACKAGING

Additionally, the printed tapes can be tailored with company name and logo imprinted on them in various color options.

We offer BOPP tapes in different size of 12mm, 24mm, 48mm, 60mm, 72mm, 120mm & jumbo rolls or as per the requirement.

14. Machine Stretch Film

Using a stretch wrap film is one of the finest ways to safeguard your goods during transportation. The highly elastic recovery nature of stretch wrap keeps the matter tightly bound. The wrap has better clinging performance and a higher holding force. The most important aspect is its stability performance in diverse weather conditions along with transparency. Our entire machine pallet wrap is strictly regulated and tested on various quality standards.

Gelid

Cold Chain & Packaging
Solutions

MANUAL HAND
STRETCH FILM

VALOR INDUSTRIES

AN ISO 9001:2015 Certified Company

PROTECTIVE PACKAGING

Our Stretch film rolls sizes do range from **100 mm to 600 mm** wide.

15. Manual Hand Stretch Film

Stretch film avoids dynamic load shifting, prevents pilferage and protects goods from dirt, dust and moisture. These stretch films are easy to wrap and simple to remove. These are widely used in for product identification, product coding, product dating, secure tamper-evident packaging, pallet load aesthetics as well as pallet load identification.

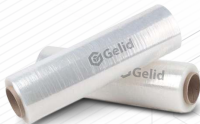

PROTECTIVE PACKAGING

We offer the customization of these products, in accordance with the requirements, elongation and specifications retrieved by the patrons. Our Stretch film rolls sizes do range from 100 mm to 600 mm wide.

16. Cling Film for Food

LLDPE food wrap cling film is self-sealing, stretchable films and have domestic as well as institutional applications. The benefits of cling film include its prevention of moisture and aroma in foods wrapped in it and keeps cooked food, fruits, and vegetables fresh and hygienic. We offer this with appropriate microns products with varied width & length.

PROTECTIVE PACKAGING

17. PVC Cling Film

We offer PVC wrap Film with high holding force, unique flexibility which enables the products to cling to the objects tightly. These are available in several sizes and thicknesses. It can be used for bundling smaller items, packing gift articles and various consumer goods & home decor products. Most importantly, it can also be used in packaging food items such as fruits, vegetables & frozen products, and bundling other eatables.

The cling films prevent spilling of liquid and help food products remain fresh & soft for a long time.

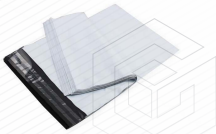

18. Tamper Evident Bags

At GELID®, we are extremely proud of our tamper-evident bags acknowledged widely as the premier and established brand in the industry. The bag designs are exclusive and cannot be easily copied.

PROTECTIVE PACKAGING

The substance used in the product is tough enough to endure normal handling yet subtle enough to trigger tell-tale signs when fiddled with.

Designed in accordance with international standards, the bags are made from 100% recyclable plastic and are extremely user-friendly in function and usage. These are used for the safe transit of confidential documents and valuables. Apart from this, these are used for keeping evidence for all secured documents, examination papers, diamonds and precious metals, foreign exchange, election papers, e-commerce, visa, immigration documents, cash in transit companies etc.

PROTECTIVE PACKAGING

19. Tamper Proof Tapes

We offer supreme quality void tape that is commonly known as security tape. It comprises of a tamper-evident surface that leaves a void pattern such as dots on the tape and the surface when the tape is lifted so that the product cannot be reused. It is highly beneficial for preventing undetected access to the product.

These are widely used by various industries, government offices and consumer markets. It is a highly reliable anti-theft sealing label that is priced competitively.

20. Double Sided – Tissue Paper Tape

Double Sided Tissue Tape is a special tape, which consists of nonwoven tissue and is coated with strong adhesive on both sides. It bonds firmly on to leather, wood, plastic, any two similar or non-similar materials.

PROTECTIVE PACKAGING

Solvent & water-based adhesive which are used in these tapes, provide strong holding power and no adhesive deterioration. Double-sided tape provides excellent temperature, solvent resistance, long storage; good shear strength, no slippage long after it is applied and is hardly affected with temperature change.

21. No Residue Tape

No Residue Tapes are manufactured using highly advanced procedures to ensure quality approved by our prestigious clients.

These tapes feature a high-temperature resistant polyester backing film to enhance its utility. These are rubber-based and pressure-sensitive adhesive tape and are also known as PCB tapes, Chemical Resistance Tapes, Zero Residue Tapes or High-Temperature Tapes.

PROTECTIVE PACKAGING

These light weighted and cost-effective tapes are mostly used in Holding, Wrapping, Surface Protection, circuit and Multipack packaging. Packing with this type of tape secures bundles yet does not damage the primary package when removed.

22. Specialty Tape

We offer a range of Specialty Tapes viz., Barricaded tape, Duct tape, Cloth tape, Masking tape, etc., which are fabricated by cutting edge technology, utilizing the supreme quality raw materials, and are procured from reliable vendors. As per the demands and specifications given by our prestigious clients, these unmatched ranges of tapes are customized as and if needed.

PROTECTIVE PACKAGING

23. Duplex Box

Backed by rich experience, we have emerged as one of the leading manufacturers and suppliers of superior quality Duplex Boxes. These boxes are known for sturdy construction, high strength, lightweight, fine finish and durability. Fabricated using qualitative raw material and advanced technology, these boxes are available in various specifications and can also be customized as per the needs or requirements.

24. Die Punching Box

We are one of the most prominent producers of Die Punching Boxes. These boxes are designed and manufactured using superior quality paper and sophisticated technology in compliance with the pre-set industry guidelines. To ensure quality, the boxes we provide are duly tested against various parameters under the surveillance of quality controllers.

PROTECTIVE PACKAGING

These boxes are cherished for excellent finishing, high strength and weatherproof qualities.

25. Tamper Proof Sticker

Tamper-proof stickers are being used at various places to ensure the integrity and authenticity of items. These are used in sensitive and/or search and seal operations prior to high profile events or activities. These products have also been successfully used in conjunction with covert security additions to the basic level.

Tamper Proof Stickers are suitable for customs, excise and duty-free areas where a quick and cost-effective security sealing solution is required from time to time.

Our products are suitable for use by police, hospital and prison authorities to secure doors, sections and scenes from unauthorized entry of people and contraband.

PROTECTIVE PACKAGING

26. Expanded Polystyrene (EPS) Bean Ball

We offer highly demanded Bean Bags' EPS (Popularly known as Thermocol) Balls. These beads are used to fill bean bags and facilitate a great level of comfort and assure complete relaxation to the body. It makes bean bags aesthetically designed, light weighted and easy to maintain.

27. Expanded Polystyrene (EPS) Chips

These chips are suitable for filling the gaps of packaging items of irregular shapes and materials like statues and machine parts to avoid damage. These EPS (Popularly known as Thermocol) chips are reusable, highly shock absorbent, light weighted and can be reused repeatedly for several times.

In order to process high-quality Thermocol Chips, our professionals employ advanced machines and utilize quality tested polystyrene procured from authentic vendors.

3. Face & Eye Mask

Our facial skin is quite sensitive to excess heat, light or dust. Due to our modern lifestyle which often includes the use of computers, driving, studying, watching TV and work overload all of which gives a lot of stress to our face & makes our face very tired.

A gel-based Face and Eye Mask by GELID® can be the perfect way to relax & rejuvenate your face. This Gel mask also helps reduce darkness and puffiness around the eyes which is the most sensitive skin on our body and also aids in sound sleep. This reusable cooling gel mask can be kept in the refrigerator for cold therapy or in warm water for hot therapy.

Eye Mask

4. Knee Packs

Whether you are recuperating from a sports injury, healing from knee surgery or suffering from a persistent condition like arthritis, cold therapy is one of the best ways to dial down the pain, reduce inflammation and soothe stiffened muscles. GELID® knee packs are one of the most efficient and suggested products for alleviating knee and muscle pains.

SAP - SUPER ABSORBENT POLYMER

Aquareserve

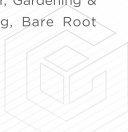

PIONEERS OF EXEMPLARY PRODUCTS

Aquareserve

AQUARESERVE® is one of the foremost revolutionary products for agriculture and other allied segments. It's a soil conditioner specially made to retain water, nutrients and land soil. In its application when the same is mixed with water, AQUARESERVE® swells fast and creates hydrogel by absorbing and retaining humongous amounts of water available in the plant hence effectively reducing the use of fertilizers and other chemicals. AQUARESERVE® is a cross-linked water-insoluble superabsorbent anionic polymer that is partially neutralized with potassium. The product is being used in a vast and versatile range of sectors such as Agriculture, Horticulture, Nurseries, Trees Transplanting, Soil-conditioner, Gardening & Landscapers, Hydro-seeding, Bare Root Dipping, etc.

Aquareserve

Advantages:

Commercial Benefits

- Increased yield of crops, vegetables, fruits, etc.
- Reduced mortality rate & rapid growth of the plants at nurseries.
- Distinguished improvement in seed-coating & bare root-dipping.
- Increasing plant performance (especially in structureless soils in areas subject to drought).
- Slow degradation enables repeated water absorption & release.

Water-Saving

- AQUARESERVE® can be efficiently used in agriculture to reduce watering frequency. They are beneficial throughout the growth cycle of plants, especially during germination, growth enhancement, and root establishment.
- Each crystal absorbs up to 300 times its weight in water, keeping the soil moist for

Aquareserve

healthier plants. These hydrogels help consistently maintain moisture and nutrient balance in the root zone, thus reducing hydric stress which can slow plant growth.

Soil Conditioner

AQUARESERVE® holds fertilizer just as it holds water. Therefore, a reduced/alterd dosage of fertilizer can be implemented as the soil has different characteristics. Finding the optimum fertilizer rate depends on your standard method of application.

Directions for application of AQUARESERVE®

It is to be mixed at the rate of 1 to 10 gm. per kg of soil at the time of planting.

For Existing Plantation: Soil up to below 6 inches after digging around the roots / main stem, apply in required dosage & irrigate sufficiently.

Fluidsorb

FLUIDSORB is a versatile product used enormously due to its high capacity of absorption. The usage is incredible, hassle-free, time-saving, environment-friendly and worth the money. The swollen gel holds the liquid in a solid, rubbery state and prevents the liquid from leaking. It can absorb more than 100 times its own weight in liquid, forming a gel that traps the liquid and doesn't release it, even under pressure.

Application of FLUIDSORB:

- Health care & Personal hygiene
- Spill Control
- Disaster Management
- Garments

EZTHICK is a new age evolution and we produce 2 variants for this thickener – Synthetic & Natural

Many liquid chemicals' molecules are drawn into the network across a diffusion gradient - formed by the Sodium neutralization of the polymer backbone. The polymer chains want to straighten but cannot due to the cross-linking. The polymer will absorb many times its weight with less than 1% negligible increase in waste volume.

EZTHICK helps as a thickener in various sectors like:

- Synthetic Thickeners for Cosmetics,
- Ceramics & Textile Printing
- Dispersants, hydrophilic Thickeners, Rheology Modifiers
- Fuel Gel, Dish Warmer, Chafing Gel, Fire Places
- Drilling
- Wastewater treatment & Hazardous Waste Stabilization

MATERIAL HANDLING PRODUCTS

- Pallets
- Crates
 - Processing Crates
 - Stackable Crates
 - Multi Utility Crates
- Tablet Packing Box
- Troughs
- Garbage Bag
- Dustbin
- Industrial Tanks
 - Processing / Pickling Tanks

MATERIAL HANDLING PRODUCTS

PALLETS

Gelid Pallets are durable, sturdy, sterile, easy to clean, not conducive to cross-contamination & long-lasting. The prolonged product life cycle reduces the product damage & is cost-effective for utilizing in a longer duration.

Advantages:

- **Strength & Size Consistency:** Gelid Pallets are made from recycled plastic & provides better consistency as compared to wooden pallets. Plastic pallets are moulded under extreme pressure in high polished moulds that leads to consistent dimensional accuracy as well as loading capacities.
- **Long-Lasting:** With normal handling and loading within design limits, Gelid pallets

MATERIAL HANDLING PRODUCTS

come up with a potential life span of about 10+ years.

- **An Investment for the future:** Gelid pallets are an asset as the long product life makes it a cost-effective product.

- **Recyclable, Environment Friendly:** Considering the environmental issues & sustainability, Gelid pallets are made from recyclable materials and are environment-friendly.

- **Hygienic:** In hygienic areas and clean rooms, cross-contamination issues from dust inherent are of great concern. Gelid Pallets have totally smooth & sealed surfaces, excluding any possibility of impurities

MATERIAL HANDLING PRODUCTS

accumulating in the pallet's structure.

- **Safe Handling:** Gelid pallets have no nails, sharp edges or splinters, and possess no risk of loose component parts breaking free under manual lifting conditions and causing injury to operatives.

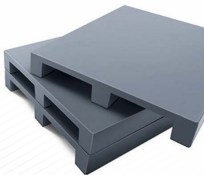

- **No Mould or Dust Contamination Issues:** Unlike wooden pallets, there are no hidden pockets or areas where dirt and dust can collect, so plastic pallet surfaces remain contaminant-free and hygienic.

- **Easy to clean:** Plastic pallets can be repeatedly steam cleaned or washed to remove any airborne dust or spilled products, which accumulate on the pallets over a period of time.

MATERIAL HANDLING PRODUCTS

- **Impervious to Moisture, Weak Acids and Alkalis:** Gelid Pallets are resistant to moisture & chemicals like weak acids & alkalis, hence do not rot, decay, decompose or react with stored material. Moreover, it protects your material in its best condition.

MATERIAL HANDLING PRODUCTS

CRATES

Features:

- Moulded out of superior grades of polyethylene
- Seamless and smooth inside out
- Strong and durable to render long term service
- Stain free
- Snag free
- Maintenance-free
- Lightweight yet strong
- Best raw material base
- Seamless construction
- Made using latest manufacturing technique
- Reasonable cost
- Excellent after-sales service

MATERIAL HANDLING PRODUCTS

- Portable with built-in pockets hence ease of handling
- Available in several designs for stacking
- Kiss-off type double collar rim for edge-break prevention
- Angular side ribs for additional strength
- Diamond shape ribs at bottom to protect against wear and tear
- Ingenious folding mechanism
- folds/unfolds within seconds
- Up to 75% volume reduction
- Ideal for food and non-food products
- High strength reduces product damage due to bulging, breaking and stack collapsing
- Safe storage of fresh food products as well as industrial products

MATERIAL HANDLING PRODUCTS

- Fully vented design for better ventilation and increased shelf-life
- Saves warehouse space
- Decreased transport costs
- Meets GMP and FDA requirements
- 100% recyclable
- Nestable, hence saves floor space
- Long life with pallet base

MATERIAL HANDLING PRODUCTS

1. Processing Crates

Features:

- Chemical resistant
- Large range to handle fabrics of all widths and types
- Vertical ribs for additional strength
- Ideal for textile, hotels, food and laundry industry

Standard Colours: Natural and grey

To be used with M.S. support trolley with wheels.

- M.S. support trolley with wheels available on request
- M.S. support trolley with wheels to be fabricated only after receipt of product at site owing to process variation.

MATERIAL HANDLING PRODUCTS

2. Stackable Crates

Features:

- Stackable
- Choice of colours for codification

Standard Colours: Natural, light blue, dark blue, pink, red, yellow, light green, light grey

3. Multi-Utility Crates

Features:

- One-piece moulded
- Hygienic, easy to clean and wash

MATERIAL HANDLING PRODUCTS

TABLET PACKING BOX

For Pharmaceutical Industry

Features:

- Stacking Capacity: 1+3
- Central locking provision in stacking
- Ideal for tablet storing in pharma industry
- Can supply container and lid in desired colour combinations
- Ideal for Pharmaceutical application

Standard Colours: Natural and grey

MATERIAL HANDLING PRODUCTS

TROUGHS

Features:

- Best raw material base
- Seamless construction
- Reasonable cost
- Excellent after-sales services
- Made using latest manufacturing technique
- Maintenance-free
- Long life

GARBAGE BAG

Garbage Bags are disposable bags made with the best quality polyethylene material and are bio-degradable & eco-friendly. With sturdy structure, long operational life & superb

MATERIAL HANDLING PRODUCTS

strength, our bags are available in different sizes & colours and are useful various industries like Chemical, Pharmaceutical, Chemical, Textiles and much more.

DUSTBIN

We offer a wide range of Dustbins that are strong, durable, and available in multiple colours. Our multi-variants in dustbins include trashcans, pedal bins, public waste containers, and much more.

MATERIAL HANDLING PRODUCTS

INDUSTRIAL TANKS

PROCESSING / PICKLING TANKS

Features:

- Best raw material base
- Seamless construction
- Reasonable cost
- Excellent after-sales service
- Made using latest manufacturing technique
- Maintenance-free
- Long life

OTHER PRODUCTS

- Intermediate Bulk Containers (IBC)
- Dryer Trays
- Road Safety Cone (round)
- FRP Grating

OTHER PRODUCTS

INTERMEDIATE BULK CONTAINERS (IBC)

Features:

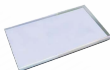

- Threaded lid
- Available with options of timber/composite plastic/metal pallet base
- Ball type bottom valve
- Standard colour: Natural for containers
- Standard: For liquids up to density 1.0
- Heavy duty: For liquids up to density 1.2

DRYER TRAYS

Features:

- Chemical resistant
- Withstand temp. from -40oC to +140oC
- Extremely Durable
- Ideal for hot air dryers used in dryer, intermediates, pharma, plastic, food storage and other industries

OTHER PRODUCTS

ROAD SAFETY CONE (ROUND)

We offer Road Safety Cone in Round shape with superior build quality and reflectivity.

Size: Diameter 375 X H 50 (mm)

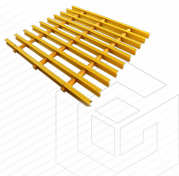

Features:

- Made of LDPE (Low-Density Polyethylene)
- Semi-flexible, UV Stabilized and made from non-fading colours
- Quick setup, knockdown and move

FRP GRATING

Features:

- Anti-corrosive
- High strength
- Maintenance-free
- Self-coloured
- Slip resistant
- Non-magnetic
- Easy Installation
