

## Ultrasonic Hook and Eye Tape Cutting Machine (SE-JB2015)

### Summary

It's a special ultrasonic cutting machine for underwear hook and eye tape cutting, it adopts cylinder and manipulator for material feeding which can effectively solve the problem of cut accuracy, in the end of each tape there is a paper adhesion preventing device, tape and the paper won't be feed at the same time (only 1mm-5mm paper be needed for each cutting.), this device will reduce the paper consumption to the lowest to promise to save the cost.

## Technical Data

<b>Model</b>	<b>SE- JB2015</b>
<b>Ultrasonic Frequency</b>	20KHZ
<b>Power</b>	1500W
<b>Voltage</b>	220V-240V/ 50-60Hz
<b>Capacity</b>	30-80 pcs/min
<b>Weight</b>	125KG
<b>Air Pressure</b>	4-6KG/CM2
<b>Dimensions</b>	200mm×550mm×1350mm (L×W×H)

## Functions and Features

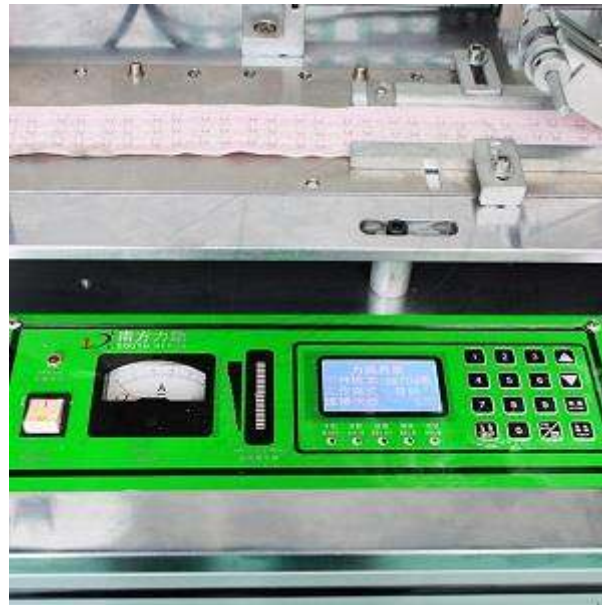

- This hook and eye use 20KHZ ultrasonic for high frequency vibrate friction to make the cut surface get high temperature, but after cutting the temperature will back to low immediately, so ultrasonic cutting has its advantages compared to the traditional way in cutter sticking, black edge, smelly in processing, hard edge and also there won't be loose edge or get gooseflesh.
- Single chip automatic control, operators only need to feeding the material onto the feeding frame, the remaining processing will be finished by machine automatically.
