

Vertical Hot Plate Welding Machine (SE-RB500)

Summary

The Vertical Hot Plate Welding Machine Simple structure, easy operation and high productivity; works can reach water and air tightness after welding; is suitable for all shapes, sizes and all kinds of material welding. hot plate welding is a processing which be widely used, economical and fast.

According to different workpieces different requirements on welding process, production efficiency, degree of automaticity, one machine with several moulds type machine and high automaticity machine with several working platforms can be chose to

LL-2, Avani Plaza, Near Satellite Towers, Opp H.P. Petrol Pump,

weld several workpieces in one welding or multistation welding in one machine, also special multi-heads hot-plate machine is available.

Technical Data

Model	SE-RB500
Voltage	380VAC
Weight	1000KG
Dimensions	1480(L)*1530(W)*2475(H)MM
Controller	PLC and Human-Computer Interface
Air Pressure	0.8Mpa 0.5M3 Air Compressor

Functions and Features

- Reinforced frame, beautiful and practical;
- PLC programming circuit control system;
- Specially designed molds, special surface treatment, hard to glue;
- To solve common ultrasonic welding which can not solve problems;
- According to the customer's requirement, Hot Plate Machines can process one or two welding parts at the same time in order to enhance productivity;
- After welding products can meet the needs for watertight and airtight.
