# For High Pressure

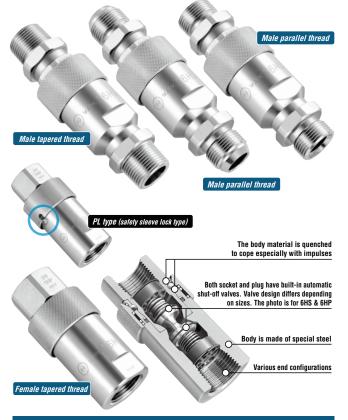

# **HSP Cupla**

For hydraulic pressure from 14.0 to 20.6 MPa {142 to 210 kgf/cm²}

# Special steel body is tough against vibration and impact! Male and female thread end configurations are available. Low pressure loss characteristic suits hydraulic equipment applications.

- Quenched special steel body!
- Powerful impact resistance, especially against impulses.
- Automatic shut-off valves in both socket and plug prevent fluid spill out on disconnection. Easy to handle.
- In addition to conventional female thread type, male thread types (male tapered thread, male parallel thread with 30° flare, and male parallel thread with 30° cone-seat) are newly added. Male thread types are designed especially for direct connection to hydraulic power units effectively.
- Male parallel thread type complies with both metal seal and O-ring seal. (In case of O-ring seal, O-rings available in the market can be used.)
- Optional HSP-DC Cuplas are available for die-casting machine applications with severe pressure variation.
- The overall length of male thread type is shorter than that of female thread type plus conversion nipple available in the market.
- PL type (Safety sleeve lock type) for 2HS to 8HS (except 66HS) with female thread is also available as standard.

Specifications

# Flow Direction

Fluid may flow in either direction from plug or from socket side when coupled.

# Interchangeability

4HSP with 6HSP or 10HSP with 12HSP can be connected each other. Other combinations of different sizes are not connectable.

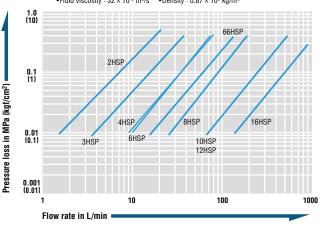

Min. Cross-Sectional Area (mm²)									
Model	2HSP	3HSP	4HSP	6HSP	66HSP	8HSP	10HSP	12HSP	16HSP

_	_	Operational				

Admixture of Air on Connection Admixture of air may vary depending upon the usage conditions.										
Model	2HSP	3HSP	4HSP	6HSP	66HSP	8HSP	10HSP	12HSP	16HSP	
Volume of air	0.7	1.9	3.5	3.5	8.2	12.4	44	44	156	

# Flow Rate – Pressure Loss Characteristics

The flow volume of male thread type is increased by 5 to 10% compared with that of female thread type with conversion nipple.

# 

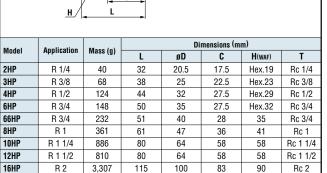

There is no interchangeability between HSP Cupla and 210 Cupla or 280 Cupla. Do not connect to each other even if sizes are similar.
