

Pneumatic Heat Sealing Machine

We provide best service in
Pneumatic Heat Sealing Machine

Product Details:

- Material:- Stainless Steel
- Voltage:- 220 V, 1 phase
- I Deal In :- New Only
- Weight :- Up to 25 Kg
- Power :- Electric
- Capacity :- Customize
- Brand :- MICRON

Pneumatic Heat Sealing Machine

How To Use?

Heat sealing is the process of sealing one thermoplastic to another similar thermoplastic using heat and pressure. The direct contact method of heat sealing utilizes a constantly heated die or sealing bar to apply heat to a specific contact area or path to seal or weld the thermoplastics together.
