

Silicone Gasket

Premium Silicone Rubber Gaskets for Automotive and Industrial Sealing Applications

Product Description

Silicone Gaskets are precision manufactured from high quality silicone rubber to deliver reliable sealing performance under demanding operating conditions. They offer excellent resistance to heat, cold, ozone, UV exposure, weathering and moisture. These gaskets are widely used in automotive, electrical, HVAC, food processing and industrial equipment.

Specification	Details
Material	Silicone Rubber VMQ
Hardness	30 to 80 Shore A
Temperature	Minus 60 C to Plus 230 C
Surface Finish	Smooth
Colors	Transparent White Red Custom
Manufacturing	Compression Molding Injection Molding

Applications	Automotive Electrical Industrial HVAC
Customization	Size Thickness Shape
Packaging	Bulk Custom Packing

Key Features

- Excellent heat resistance
- High flexibility
- Weather and UV resistant
- Excellent sealing performance
- Custom sizes available
- Suitable for OEM and aftermarket applications
