

20 mm Grey Injection Cap

Premium Rubber Injection Cap for Automotive Medical and Industrial Applications

20 mm GREY INJECTION CAP

Precision Sealing | Durable | Reliable Protection

The 20 mm Grey Injection Cap is a precision molded sealing component designed to provide reliable protection and leak-proof sealing for injection ports and industrial equipment. It prevents the entry of dust, moisture and contaminants, ensuring improved performance and longer service life.

KEY FEATURES

-  Precision molded construction
-  Secure and leak-proof sealing
-  Excellent flexibility and durability
-  Resistant to dust and moisture
-  Smooth surface finish
-  Long service life
-  Easy to install and remove
-  Available in custom sizes and colors
-  Suitable for OEM and industrial applications

SPECIFICATIONS

Parameter	Details
Product Name	20 mm Grey Injection Cap
Material	Rubber
Color	Grey
Size	20 mm
Shape	Round
Hardness	40 to 80 Shore A
Temperature Range	-40°C to +120°C
Surface Finish	Smooth
Manufacturing Process	Compression Molding or Injection Molding
Diameter	20 mm
Thickness	As per customer requirement
Flexibility	Excellent
Water Resistance	Excellent
Dust Protection	Excellent
Chemical Resistance	Good against water and mild chemicals
Oil Resistance	Moderate
Weather Resistance	Good
Tear Resistance	High
Applications	Injection Ports, Medical Equipment, Laboratory Equipment, Automotive Components, Industrial Machinery
Packaging	Poly Bag, Box Packing, Bulk Packing
Customization	Size, Color, Material, Hardness
Supply Capability	Bulk Orders, OEM Manufacturing
