

# Chemical Reactor

The Chemical Reactor is a high-performance industrial processing system designed for efficient chemical mixing, blending, heating, and reaction applications. Manufactured using premium-grade stainless steel, this reactor provides excellent corrosion resistance, durability, and long operational life. It is widely used in chemical, pharmaceutical, paint, resin, adhesive, and cosmetic industries. The reactor features automatic operation, PLC control support, vacuum-resistant vessel construction, and a high-speed agitator system for efficient processing. Its sturdy design ensures safe and reliable industrial operation with minimal maintenance requirements.

Specification	Details
Product Type	Chemical Reactor
Material	Stainless Steel
Capacity	500-10000 Ltr
Automatic	Yes
PLC Control	Yes
Mixer Type	Agitator Mixer
Heating System	Electric Heating
Drive Type	Electric
Voltage	220-440 Volt
Motor	AC Motor
Features	High Speed, Vacuum Resistant Vessel, Digital Timer
Color	Silver
Supply Ability	10 Per Month
Delivery Time	2-10 Days
