## About Us

The urge for better & convenient packaging has made mankind to come up with more options. There are boxes, sheets, bags, pouches and a host of other items that are making packaging much easier for customers in numerous industries. Leading the field of packaging that has many options for customers to use, is no other establishment than Tirumala Engineering Industries. We are a hub of innovative packaging machines that are used in ample of industries.

Our company marked its beginning several years ago for improving packaging domain. Earlier, extremely limited options are present for customers whenever they need to pack their products. Today, market has so much to offer in terms of packaging options. This is making utmost simple for customers to opt packaging that goes exactly with their requirement.

Our company has embraced business role of packaging machines manufacturer in India that brings forth top-grade array at inexpensive prices. We are using well-researched production ways for manufacturing our machines. Our range of machines including Collar Type Powder Pouch Packaging Machine, Automatic Packaging Machine, Pouch Packaging Machine, Pneumatic Packaging Machine, Granules Pouch Packaging Machine, etc., are fitted with verified parts that supports their efficient functioning in different circumstances. We have manufactured machines in several capacities by taking into account our valued customers requirements. All our top-quality machines make human intervention in work extremely minimum.

## Packaging Adds To Sales

Packaging is that component that has brought huge change in the sales of many companies belonging to different industries. The possibilities of products getting damage has reduced to a high degree mainly because of hike in the number of packaging items. Today, every company is emphasizing on packaging because customers asks for it. Looking at how packaging is adding to sales of businesses, we are providing machines that possess capacity to meet requirements of packaging materials. We have designed our machines keeping exact needs of our customers in mind. All the machines require no special training as they are designed for user-comfort and efficient output.
