More flexibility to your workflow

Easy-to-see, Easy-to-use 10.1 Inch Panel

The large 10.1 inch panel ensures quick and easy operation to maximize productivity. The easy interface will help you reduce operational errors and the user-friendly panel will enhance user experience.

Standard Web Browser

You can use multi-touch UI in the operation panel to access, display and print web page content. It makes it convenient for you to print pages from PDF files that can be viewed on websites, or print maps of places you are about to visit.

Optional Paper Feed / Output Options

Now enjoy greater output with 1,150 sheets standard paper capacity of the MFP. With the optional paper feed unit, you can increase the paper capacity up to 3,650 sheets. The optional Large Capacity Unit (maximum of 6,650¹⁾ sheets) improves productivity and reduces paper replenishment time.

¹⁾ When optional Paper Feed Cabinet PC-415 and Large Capacity Unit LU-302 are mounted.

*The paper supply capacity for all models is based on 80g/m²

Product Design

The bizhub C558/C458 adopts easy and intuitive INFO-Palette design with smart user interface. This unified design ensures similar user experience across PCs, tablets or smart-phones.

Faster Scanning Speed And Precise Outputs Create Smooth Workflow

A single pass dual scan document feeder is mounted as standard, and it enables 240 OPM¹⁾ superscript scanning in colour. Up to 300 original documents can be loaded. Advanced scanning technology enhances scan quality and a large volume of scanning job can be processed quickly.

¹⁾ At 300dpi, 2-sided

All-in-one Compact Finisher Enables Diverse Output

The FS-537 finisher houses all output options within a body less than 1,400mm wide to meet your diverse output requirements while simplifying installation and deployment. If a jam occurs in the finisher, the purge function will automatically eject the jammed paper to the inner output tray of your printer.

Advanced security technology protects important information

Authentication on the MFP Main Unit

You can perform authentication directly on the main unit. Detailed access control can be set up for each function, including copy, print, scan and fax¹⁾.

¹⁾ Optional Fax Kit FK-514 is required.

IC Card Authentication

Authentication is possible²⁾ with various types of IC card³⁾, including cards that comply with the SSFC (Shared Security Formats Cooperation) standard. Besides the IC card, another way you can perform authentication is by using any Android device⁴⁾ equipped with an NFC antenna

²⁾ Optional Authentication Unit AU-201S is required.

³⁾ Compliant non-contact IC cards include FeliCa (IDm), SSFC, FCF, FCF (campus), FeliCa Private, and MIFARE (UID).

⁴⁾ Requires Android 4.4 or later that supports HCE (Host Card Emulation) or PageScope Mobile for Android v4.1 or later.

Biometric Authentication

Your finger veins become the most accurate authentication tool. Biometric authentication is easy to implement and offers very high-level security.

* Optional Biometric Authentication Unit AU-102 and Working Table WT-506 are required.

Server-Less Pull Printing

The print jobs you send can be printed from any MFP in the office print group. This allows you to build a server-less pull printing system more easily and at low initial cost.

* A pull printing system consisting of a maximum of 10 MFPs can be created. All corresponding MFPs must be in the same network.

* Optional i-Option LK-114 is required to be installed in each MFP.

HDD Mirroring

Supports "Mirroring", which synchronises main HDD data and backup HDD data in real time. In the event of main HDD failure, operation automatically switches to the backup HDD to drastically reduce the risk of data loss.

* Optional HDD Mirroring Kit HD-524 is required.

TPM (Trusted Platform Module)

You can easily control confidential information with a TPM (Trusted Platform Module) security chip that encrypts and decrypts confidential data. Encrypted confidential information is stored in a dedicated storage area in the chip to prevent unauthorized reading from external devices.

* Optional i-Option LK-115 v2 is required.

Flexible connectivity supports diverse work styles

Connect with Android Devices

The new Mobile Touch Area on the operation panel is ready to support NFC (Near Field Communication) connection with Android¹⁾ devices. You can touch the area with your Android device to perform pairing through PageScope Mobile (PSM). Select files in PSM, then touch the device to the operation panel to print²⁾. Or you can simply touch the device to the operation panel to scan³⁾.

¹⁾ NFC connection requires Android OS 4.4 or higher to be installed.

²⁾ A wireless LAN environment is required to perform touch to print and scan.

Connect with iOS Devices

If you have an iOS device, it can search for and register a nearby MFP in PageScope Mobile (PSM)¹⁾ via Bluetooth LE (BLE)²⁾ technology.

Additionally, you can also use your iOS devices to log into the MFP via BLE connection. Select files in PSM to print³⁾ directly from iOS devices or scan⁴⁾ files directly to the iOS devices.

³⁾ PageScope Mobile for iPhone/iPad version 5.0 or higher is required.

⁴⁾ Optional Device Connection I/F Kit EK-609 is required.

⁵⁾ Wireless LAN environment is required to perform print and scan

Document Digitalisation

You can scan and convert paper documents into PDF and OOXML (pptx, docx, xlsx) file formats. Choose a file format suitable for objective of your work to widen the potential of documents for secondary usage. (Optional i-Option LK-105 v4 or LK-110 v2 are required to use OCR.)
