About Us

LPM Engineering Private Limited is dedicated to redefining the benchmarks of industrial excellence with a solid presence in the field of construction material-making machines. As a manufacturer, supplier, and trader, the company serves the changing demands of the infrastructure industry by providing high-performance machinery that is both durable and innovative. The product portfolio consists of fully automatic concrete paver block machine, industrial concrete batching plant, hydraulic operated paving block making machine, fully automatic fly ash brick making machine, hollow block making machine, industrial mobile concrete mixer, ms pan mixer machine, and industrial tile making machine.

These machines are designed for efficient production with reduced labor, making them suitable for large-scale work as well as upcoming businesses. Designed with heavy-duty materials and sturdy construction, the systems ensure long service life even under the toughest working conditions. With state-of-the-art automation, computerized control panels, and accurate hydraulic operation, the machines provide consistent high-quality output. Adaptable mold options, power-saving designs, compact footprints, and shortened cycle times ensure maximum production and space efficiency. The use of modern vibration technology is guaranteed to give better compaction, and self-diagnosis maintenance minimizes downtime. From the handling of the materials to its maintenance, the machines are geared to minimize wastage and promote ease of maintenance.
