# ABOUT US

---

**Shapes** was founded in 2007 to bring class to the kitchens and tables across India Through beautifully designed kitchenware and cutlery. We create designs that are loved by people from all generations. This can be attributed to our many and varied designs that appeal to classic sensibilities as well as modern modes.

Hospitality has been a revered tradition in India for thousands of years, and it has survived even to the modern Indian household. **Shapes** helps you give your guests the best food experience with its cutlery and kitchenware. Our collection is an excellent demonstration of the beautification of cutlery.

## **Quality**

Our first priority is given to the usage of raw materials. In order to provide healthier well-being to all the individuals, we make sure that the raw materials used for manufacturing are FDA test (US Standards)/ LFGB Test (European Standards) approved.

Our supervisors keep an eye on the quality check at every stage of the process, right from manufacturing to dispatch. In this way, we make sure that no product goes out in the market without clearing the quality check procedure.

Our advanced quality control systems ensure that functionality of all our products is exclusively customised to the unique needs and requests of our clients.
