AMERICA'S SLEEP SPECIALIST

COMPANY OVERVIEW

Established in the 1890's by Sam and Max Weisglass, Eclipse® was founded on the principles of quality, craftsmanship and tradition.

What started as the Weisglass Spring Company in a small town outside of Ukraine, quickly expanded in to the U.S. Cabinet and Bedding Company, and is now New York-based Eclipse® Sleep Products, one of the largest bedding companies in the world. Today, we spread across 62 countries, spanning 6 continents.

Eclipse® is forever evolving, but we continue to honor the principles on which we were founded. We consistently strive to combine the traditional craft of mattress design with new and innovative technologies to further enhance our consumers' sleep experience.

www.eclipsesleepmattress.in

LEADERSHIP

Eclipse was founded over 115 years ago on the principles of quality, tradition, and fine craftsmanship. Those qualities can still be found in the products we manufacture today. In addition to making products with the finest quality materials, we have added the latest in patented technologies to our sleep system. These technologies not only improve the quality of our mattresses, but ultimately improve the quality of sleep. At Eclipse, we have always known that sleep and health work hand-in-hand, and so, we are dedicated to providing you and your family with the finest sleep system available.

- Stuart Carlitz, CEO

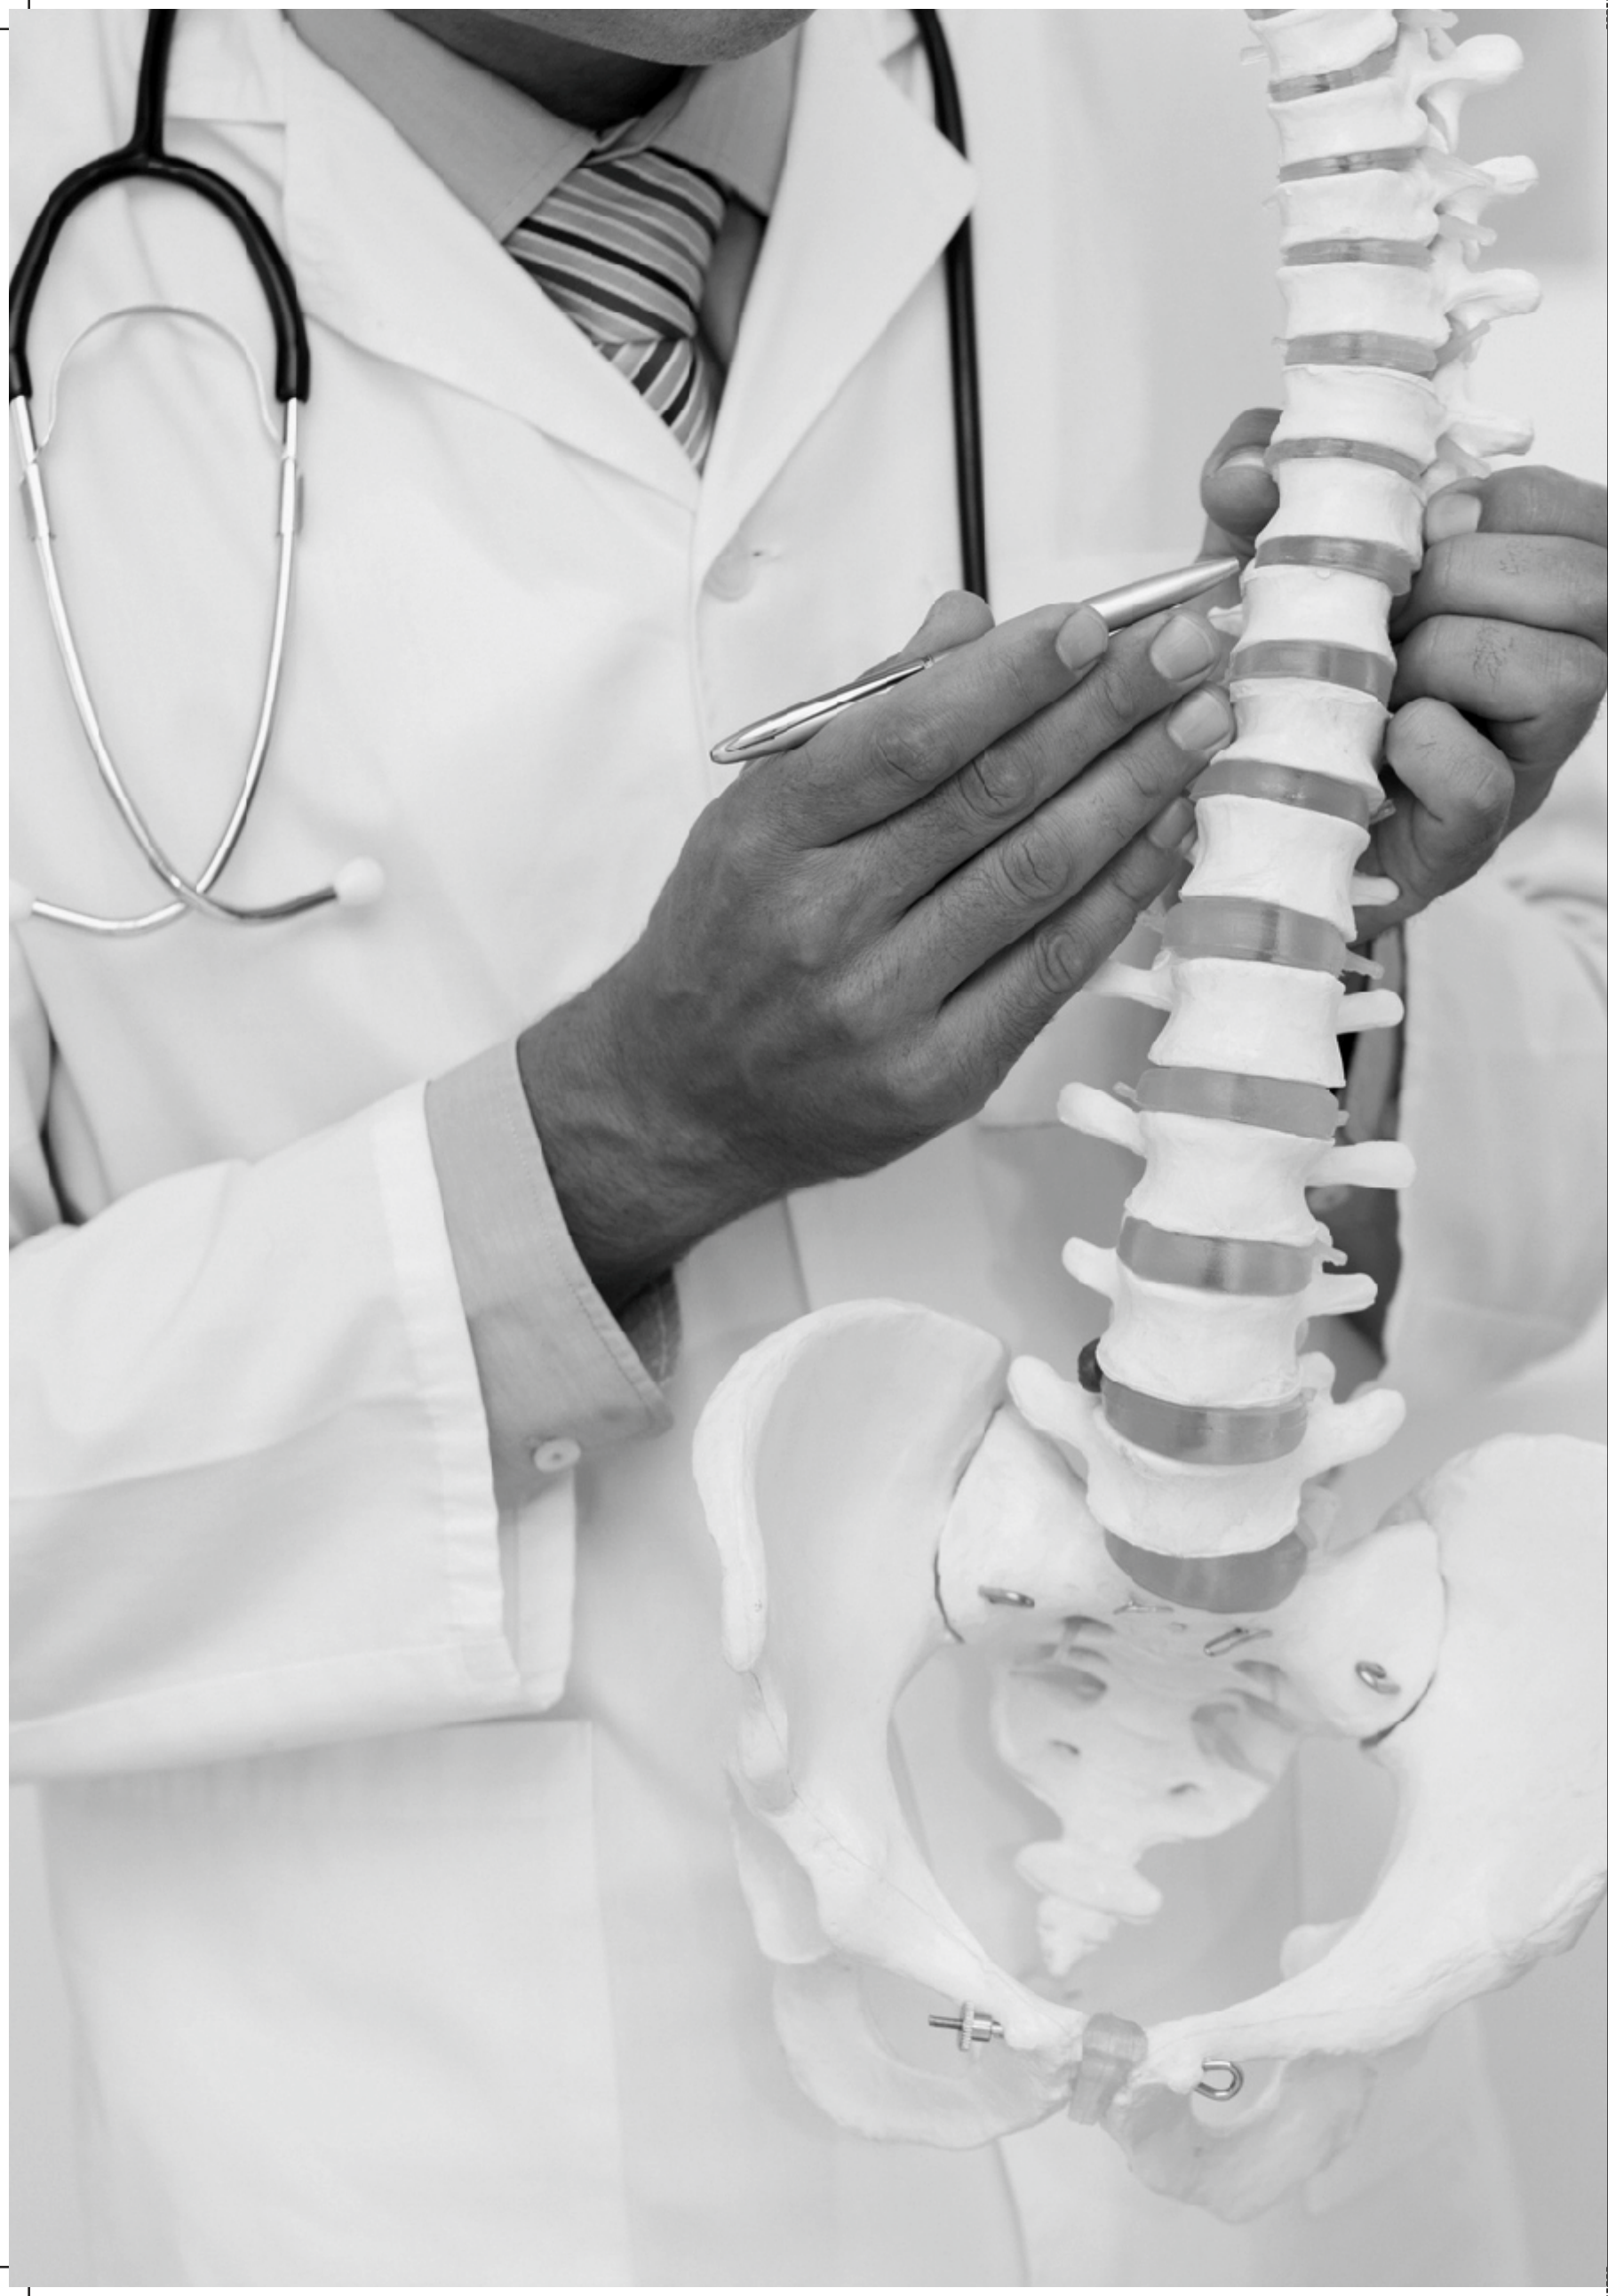

STUART CARLITZ, CHIEF EXECUTIVE OFFICER

Stuart Carlitz has over thirty five years of extensive marketing and manufacturing experience in the bedding industry. As the current President and CEO of Bedding Industries of America (a manufacturer of Eclipse sleep products), Carlitz has been instrumental to the Eclipse brand, introducing new patents and technologies to our clients across the globe and continuously expanding our reach.

GERALD GERSHAW, CHAIRMAN

Gerald Gershaw initially entered the mattress industry in 1955. Taking over Bedding Industries of America, Gershaw developed the small New Jersey manufacturing unit into a globally-trusted name, by signing over fifty factories on six different continents. In 1999, Gershaw and Carlitz acquired Eclipse International together, elevating the brand to an international level through effective leadership, unwavering dedication, and forward-looking strategy. As chairman, Gershaw guides Eclipse to new heights and consistently achieves excellent results.

PROFESSIONAL ENDORSEMENT

Dr Jason Hagman

Eclipse® International is the only mattress brand endorsed by the Congress of Chiropractic State Association. As the largest chiropractic representative organization in the world, the COCSA is made up of over 50 chiropractic associations and represents thousands of chiropractors throughout the world. The COCSA is recognized as a symbol of quality and healthy living. The Congress Seal of Approval can be found on all Eclipse® International products and mattress with the patented Spinal Zone Support Technology.

THE CONGRESS OF CHIROPRACTIC STATE ASSOCIATIONS

- Largest chiropractic representative organization in the world
- Endorses the Spinal Zone® patented sleep technology
- Recommends Eclipse® mattress to all chiropractors and their patients
- Supports Eclipse® International through publications, journals, conventions, seminars, chiropractic referral, and recommendation programs
- Distribution of Eclipse® promotional material to all state associations and their members
- Seal of Approval is recognized as a symbol of superior quality, and a product of good health
- Seal of Approval is found on Eclipse® POP and marketing material
- Seal of Approval can be affixed to any mattress with Spinal Zone®

OUR MISSION

With a family legacy in mattress manufacturing, Eclipse aims to enhance the quality of sleep by providing the finest handcrafted sleep products to improve the overall well being of our patrons. Our commitment to traditional craft, luxury and ergonomic design set us a class apart.

OUR PROMISE

We at Eclipse believe in creating premium sleep products that exhibit the traditional craft of mattress design and development. Committed to adapting to advances in technology, Eclipse utilizes the science of sleep as a solid foundation to achieve genuine results and find solutions to create healthy sleeping environments for our valued clients.

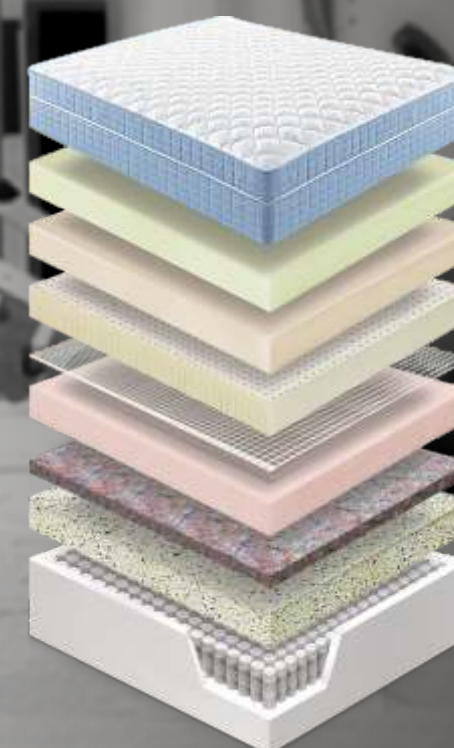

OUR PRIDE

Eclipse International is proud to offer our customers exclusive, patented and proven mattress technologies that we take the utmost pride in inventing and developing. Our dedicated teams of researchers continuously design and model advanced ways to manufacture bedding so that our trusted customers always get a good night's sleep.

MATTRESS TECHNOLOGY

Eclipse International takes great pride in offering its customers exclusive, patented and proven bedding technologies. Our team of skilled researchers work daily, in a tireless pursuit to develop new and creative ways to provide our customers the best sleep quality, with special attention to product development, innovation, and extensive quality checks.

**CLINICALLY TESTED
PROVEN SUPPORT**

SCIENTIFIC RESEARCH RESULTS:

- ✓ **29%**
IMPROVED SLEEP QUALITY
- ✓ **34%**
REDUCES BACK PAIN
- ✓ **96%**
REDUCES BACK STIFFNESS

Eclipse's Patented Lifedge Perimeter Support technology provides greater edge support around the entire perimeter of the mattress for ultimate sleep comfort and quality.

Lifedge inserts steel butterfly spring supports into our foam encased rail border. This extends the life of the mattress by eliminating soft, sagging edges while also increasing the sleeping surface with its edge to edge protection system.

Eclipse's Patented Allergy Free Design virtually eliminates the problem of dust mites and other micro-organisms. The design uses specific, exclusive fabrics and materials that inhibit these creatures from entering your bed while still allowing air to pass through to the inner components of the mattress.

In addition, Eclipse implements a patented sealing process that effectively prevents dust mites and other micro-organisms from entering the mattress at the seams.

Eclipse's Patented Spinal Zone Sleep System is clinically proven to reduce back pain for a healthier night's sleep. Traditional inner springs are framed with the use of a border rod. Spinal Zone uses an additional, slightly lighter border rod that attaches to the centre-third section of the mattress: providing enhanced back support. As per clinical studies performed by the director of human performance conducted at University of West Virginia, Eclipse has proven:

- Additional body support
- Reduced back pain
- Preserving mattress life

Inbalance is our 5 Zoned Innerspring System. With this technology, each zone includes a specific and individual concentration of coils providing body conscious support. No matter what sleep position, Inbalance technology provides greater coil reaction than any other innerspring unit. The open-offset coils provide counter balanced, straight-line deflection that equalizes motion when weight is applied. This helps to adjust to your sleep style, relax muscle tension, and virtually eliminate partner disturbance.

Coil On Coil uses both Pocketed and Bonnell springs to offer optimum support and comfort in Plush and Firm comfort levels in one single mattress. The use of this supreme Coil On Coil patented technology in combination with other Eclipse patented technologies makes it the most advanced and superlative mattress in the bedding industry.

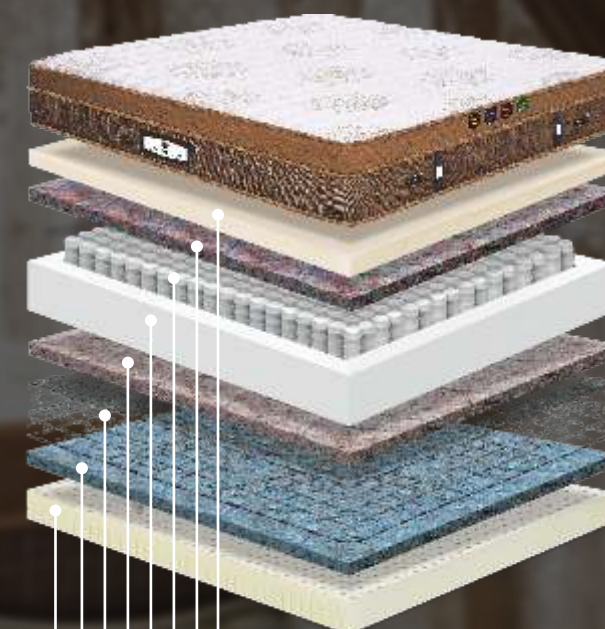

The Patented Zoned Quilt Support System pre-compresses the cushioning materials in the center third section of the sleep system to eliminate mattress breakdown and strengthen the section in which body impressions most commonly occur. Back pain, stiffness, and discomfort are most commonly associated with the center third or lumbar region of the mattress. Eclipse's Zoned Quilt technology implements an additional layer of visco-elastic memory foam within the fortified quilt region - providing extra pressure point relief together with supreme comfort and support.

THE BEST OF BOTH WORLDS: MOST ADVANCED & SUPERLATIVE DUAL SPRING TECHNOLOGY.

Meet our most advanced mattress yet. Coil on Coil combines our Pocketed Springs and Bonnell Innersprings so that you are offered optimum support and comfort. This Dual-Spring technology allows the springs to interact with each other, therefore providing both Firm and Plush comfort levels. Now you never have to settle for just one option ever again.

- 416 heavy gauge Bonnell Innersprings and 941 Encased Pocketed Springs
- Spinal Zone patented technology reinforces the mattress' center third section, providing enhanced back support
- Patented Life Edge Perimeter Support technology provides greater edge support around the entire mattress perimeter
- Allergen-free fabric that eliminates dust mites and other microorganisms

TiaraCool
Gel Series

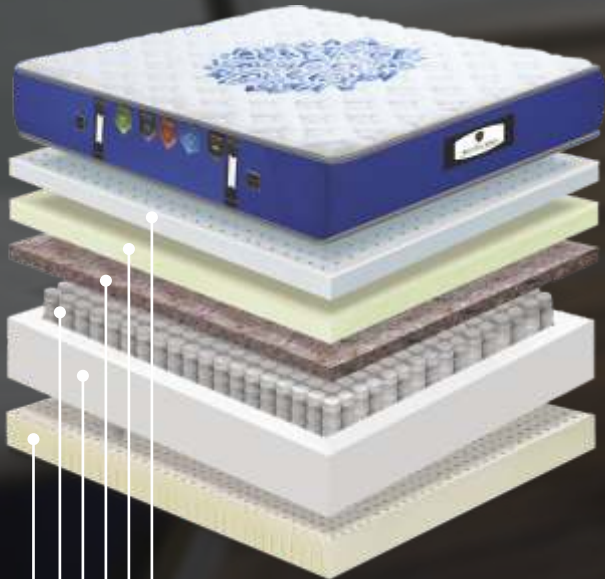

THE CROWNING JEWEL OF YOUR KINGDOM: POCKETED, COOL GEL & VISCO MEMORY FOAM MATTRESS.

Tiara Cool is the mattress that defines 'the perfect fit'. This handcrafted masterpiece moulds itself to your body with its memory foam and cool gel layer, which is mounted on a superior body-supporting core of pocketed springs exclusive to the Eclipse brand. For those cold winter mornings and hot summer nights, it is designed for a thermally neutral and comfortable sleep, with memory foam and cool gel on one side and natural latex on the other, making it the most luxurious sleeping experience you deserve.

- Designed for thermally neutral sleep
- Specially-formulated gel regulates excess heat for a more comfortable sleep
- Pressure-relieving materials for a more restful sleep
- Supported with Pocketed spring and Natural Latex on one side (Winter Side)
- Wrapped with Memory Foam and COOL GEL on the other side (Summer Side)

Romance

PATENTED COMBINATION OF NATURAL LATEX, MEMORY FOAM & HR

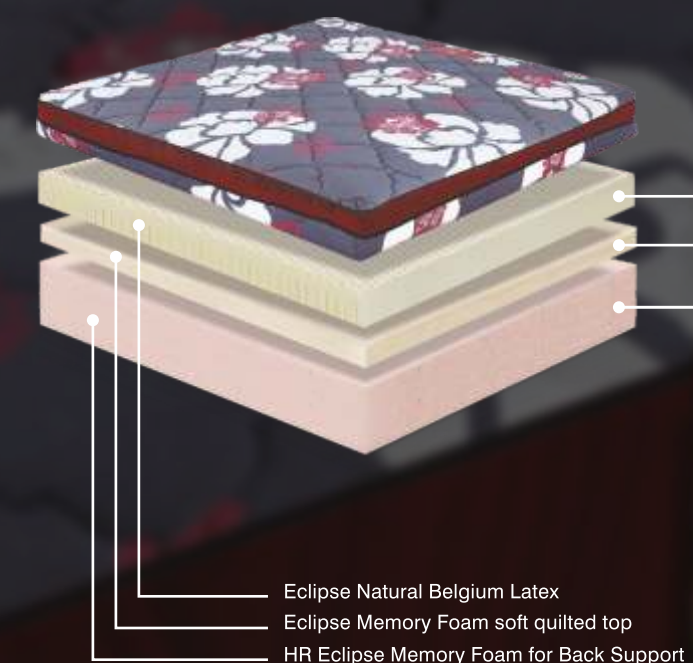

Romance, like its namesake, is the bringing together of two people and their individual needs. The Romance mattress uses a unique blend of Eclipse Natural Latex, Eclipse Visco Elastic Memory Foam, and High Resilience Foam, which takes those different needs into consideration. Our patented technology of interchangeable inner layers provides multiple comfort levels in one single mattress by giving users the option to allow one half of the mattress to be firm and the other half to be plush, so you and your partner can sleep comfortably without having to forego your naps in the name of love. This mattress provides a relaxed and calm haven to unwind in after a long day, improving your sleep quality and awakening your senses with the sunrise.

ADVANTAGES OF THE ROMANCE MATTRESS:

- Helps in awakening your senses
- Reduces pressure points
- Improves blood circulation
- Improves sleep quality
- Enhanced back support
- Makes you feel relaxed and calm

OUTLAST

As the name suggests, Outlast is designed to fulfil any of your sleep desires in terms of comfort and luxury. It derives its name from the Outlast fibre used in its manufacturing. Outlast fibre was first designed by NASA for their moon landing programme. It is decked with the excellent qualities of absorbing, storing and releasing heat in the form of latent heat to maintain overall body temperature.

- NASA designed Outlast fibre to regulate heat
- Pressure relieving Visco elastic memory foam on top
- Luxurious High Resilience Foam at base
- Free of odors, environmental friendly and breathable

Harmony *EDGE*

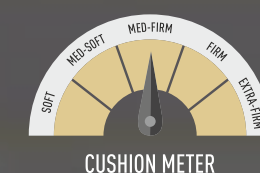

With an amalgamation of luxurious HR foam as core coupled with a thick layer of pressure relieving Visco Elastic Memory Foam and 100% latex top, your search for the most luxurious mattress ends here. Harmony Edge is designed with Tencel fabric for optimum comfort and next to none carbon footprints.

BENEFITS OF TENCEL FABRIC

- **Eco-Friendly** : The fabric is reasonable in the utilization of Power and raw materials and is fully biodegradable
- **Rich in Colour** : Tencel was made keeping color in mind due to the high absorbency of fibers
The fabrics can be colored to high quality standards
- **Absorbs Moisture** : This eco Fabric has natural absorbance and absorbs moisture 50% more than cotton
- **Anti-bacterial** : Due to its moisture management, Tencel is hygenic and germ disinfectant
- **Fabric Texture** : Tencel fabric is lightweight, soft, comfortable and breathable
- **Incredible for Sensitive skin** : Tencel's smooth fiber surface feels delicate and supple towards the skin
- **Reliable** : This superior fiber can last longer when both wet and dry, and is most conveniently invulnerable to wrinkles

ORTH[®] LATEX LX

Ortho Latex LX is made with 7 Zone 100% Latex on top of high density Orthobond foam as core providing firm support to body. High performance graphene fabric with GX technology is used. The 7 Zones created by the zonal latex provide optimum support and comfort adjusting to the different pressures exerted by different body parts.

BENEFITS OF GRAPHENE FABRIC

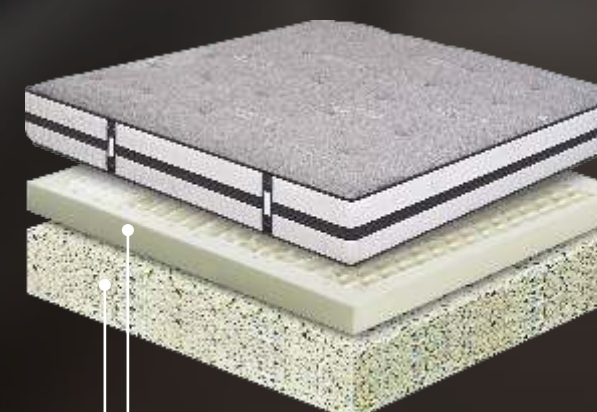

- **Uniqueness of Thermal attribute**
It allows for a homogenous distribution of heat production by the human body in cold temperature and heat diffusion in hot temperature
- **Bacteriostatic impact**
Improves cleanliness and anti-odour features

7 ZONE LATEX

Adjusts to varied pressure levels exerted by body for superior customised support
