## Customized Vacuum Formed Trays

**Customized Vacuum Formed Trays** contain individual pockets of various configurations. These **Trays** typically incorporate stacking features which allow the components to be protected from the weight of the loaded trays placed on top. The tray design frequently incorporates reliefs that allow for easy removal of the components from the tray pocket by finger or tools. Many **Customized Vacuum Formed Trays** are designed to utilize a rotational index feature to assure correct stacking.

We offer a range of **Vacuum Formed Trays** in a variety of pocket sizes and shapes made out of different materials i.e. HDPE, PP, ABS, HIPS & in different thicknesses depending upon the size & weight of your **Automobile Parts and Tools**.

We also offer recycled materials that help contribute to a more green environment.

In many applications these **Trays** can function as a mobile carrier through the production cycle and then also function as the final shipping container which is then placed in a standard cardboard box. **Customized Vacuum Formed Trays** can also incorporate part number and company logos or identification markings.

For more information about our environmentally friendly packaging products, please call **+91-99 53 54 8888** or contact us to know how **PMH SOLUTIONS PRIVATE LIMITED** can solve your sustainable packaging needs.

# Our Products

**Customized Wire Metal Cage** made of metal wire fully galvanized and MIG welded. Specially designed to take the appropriate load and fully foldable to ease the return logistics.

# Our Products

# Advantage

**Vacuum Formed Tray** are a highly versatile style for tools & parts. They come in a wide variety of shapes and sizes, and they can be made from a wider range of plastics than any other type of packaging.

This versatility makes them advantageous for everything from highly secure automobile & Industrial packaging for dividing up tools to handling and transportation.

This flexibility isn't the only advantage that plastic trays can offer, though—they are a popular choice in different industries for a variety of reasons i.e. easy to handling, transporting , storing and stacking.

**Customized Wire Metal Cage** specially designed to take the appropriate load and fully foldable to ease the return logistics

**The most thing, its production & use is very eco-friendly with green environment.**

# About Environment

## Earth Friendly, Green Packaging

The big question on many eco friendly minds is, 'how do I go green?'

That's why every day more customers look to *PMH SOLUTIONS PRIVATE LIMITED* for sustainable packaging solutions.

Our packaging services combine cost-effective solutions with innovative ideas. We implement sustainable production practices to recycled corrugated materials.

PMH's commitment to the environment goes beyond production, all the way to the office and work floor. That's because we take sustainability very seriously. Since our inception, we have implemented many earth friendly initiatives, such as plant-wide recycling for all corrugated material and non-contaminated plastic waste. As a green company, we strive to operate in the most efficient and responsible manner possible, and look for new ways to improve this policy every day.

For more information about our environmentally friendly packaging products, please call **+91-99 53 54 8888** or contact us to know how *PMH SOLUTIONS PRIVATE LIMITED* can solve your sustainable packaging needs.
