SCRAPED SURFACE HEAT EXCHANGER

About Us

We, Sahyadri Engineering Corporation started our remarkable business journey back in 2009, when Late Shri. B. D. Shelke laid down the foundation stone. Our founder took the company to great heights of success in a short span of operation. Mr. Dinesh B. Shelke, our current proprietor and a qualified engineer by profession shifted the infrastructure facility to 100 km north of Mumbai, where there was massive space. Under his supervision, the company started the fabrication of process equipment for paint & textile, petrochemical, petroleum, chemical, pharmaceutical, and varied other industrial segments. Today, we proudly deliver our clients with best-in-class GMP Reactors, Storage Tanks, High Speed Mixers, Air Receivers, etc. Our team has been constantly executing phenomenal jobs by doing customization of our range as per the demands of clients. Owing to their hard work, we have earned the complete trust of many reputed names in the industry such as Aarti Drugs Ltd., Pioneer Jellice India Pvt. Ltd., Berger Paints, Asian Paints Ltd., Kansai Nerolac Paints Ltd., etc.

Our company is renowned in the marketplace as a reliable manufacturer and supplier, we focus on incredible quality management of our range. Our team follows an inspection test plan (ITP) to ensure that the best is dispatched from our facility. The raw materials used in the production process are quality tested. Also, the manufactured range goes through a series of tests at our test labs. We conduct all the quality tests as per the norms of the industry. This allows us to maximize the profit of our clients, at all times.
