Versatile Applications & Commercial Uses

The compact 4×4 Feet Premium One Sauna Room is suitable for wooden and tiled floors and can be integrated into a variety of indoor wellness spaces. Its compact footprint and modern features make it suitable for homes, spas, wellness centers, personal wellness suites, therapy rooms, and commercial environments focused on relaxation and wellness.

Installation & User Convenience

- Knock-down packaging for convenient transportation and assembly
- Clear installation instructions
- Portable, free-standing cabin design
- Tool-free assembly concept
- Outside manual control panel for convenient operation
- Designed for quick heating with an average warm-up time of 30–40 minutes

Packaging, Delivery & Service

Each sauna room is carefully packaged using robust protective materials to help secure the components during transportation. Orders are processed after confirmation and supplied through reliable transport arrangements. The product is primarily supplied across the Indian domestic market, with responsive customer support and All-India service and installation availability.

Health & Wellness Applications

The sauna is designed as a wellness and relaxation product. Regular sauna sessions may support relaxation, stress reduction, improved circulation, and general wellness. Users should follow appropriate sauna-use guidance and consult a healthcare professional when necessary.

Frequently Asked Questions

Q: How is the 4×4 Feet Premium One Sauna Room installed?

A: The sauna arrives in knock-down packaging and is designed for straightforward assembly with clear instructions.

Q: What are the wellness benefits of using this sauna room?

A: Sauna sessions are commonly used for relaxation, stress relief, wellness routines and heat-based therapy. Individual results can vary.

Q: Where can I use this sauna room?

A: It is suitable for homes, spas, wellness centers, personal wellness suites and therapy rooms. It can be installed on suitable wooden or tiled floors.

Q: What is the process for ordering and receiving the sauna room?

A: Orders are processed after confirmation. The sauna is securely packaged and dispatched using reliable transport arrangements, with domestic delivery and customer support available across India.

Q: How does the anti-fungal and anti-bacterial treatment help?

A: The treated American Pine wood is designed to help reduce microbial growth and support a cleaner, more hygienic sauna environment.

Q: What is the energy consumption of this sauna room?

A: The specified electrical power is up to 2000 Watts at 230 V using a 15 AMP single-phase plug point. Actual energy consumption depends on usage duration and operating conditions.

Q: Can the sauna be customized?

A: Yes. Customization is available in selected sizes, features and configurations according to project requirements.
