Versatile Applications & Professional Usage

The 8×8 Feet Club Zen Sauna Room is engineered for demanding commercial environments such as hotels, resorts, spas, gyms, and wellness centers. Its spacious modular layout is suitable for group relaxation and wellness sessions. The combination of advanced heating, modern features, and a free-standing design makes it suitable for professional spa environments, wellness routines, and heat-based relaxation applications.

Installation & Convenience

- Modular, floor-standing configuration
- Portable design with convenient installation
- Outside manual control panel
- Full-glass front door option for a premium visual appearance
- Bluetooth music system for an enhanced user experience
- Red Light Therapy lighting
- Customization available according to project requirements

Safety & Performance

The sauna is designed with a focus on controlled heating and commercial usability. The specified operating temperature range is 65°C to 75°C. The heating system uses concave ceramic heaters and 360° Far Infra-Red emission for uniform heating. Actual warm-up time and energy consumption may vary depending on ambient conditions, installation, and usage.

Delivery, Transport & Domestic Market Reach

The Club Zen Sauna Room can be supplied through reliable transport arrangements for customers across India. Orders can be initiated through a purchase order, followed by packaging and dispatch as per agreed commercial and delivery terms. All-India service and installation support is available, subject to location and project requirements.

Frequently Asked Questions

Q: How does the high-efficiency electric sauna heater benefit users?

A: The electric heating system is designed to provide consistent warmth and efficient operation. The stated average warm-up time is approximately 30–40 minutes, depending on ambient and installation conditions.

Q: What safety features are included in the Club Zen Sauna Room?

A: The sauna is designed for controlled operation with an outside manual control panel and specified temperature range. Any additional safety features should be confirmed according to the final customized configuration.

Q: Where can I install the Club Zen Sauna Room?

A: It is best suited for hotels, resorts, spas, gyms, wellness centers, and other appropriate indoor commercial wellness spaces.

Q: What is the process for purchasing and transporting the sauna room?

A: A purchase order can be issued to initiate the procurement process. Delivery is arranged through reliable transport services according to the agreed order and shipping terms.

Q: Can the front glass design be customized?

A: Yes. A front-side full glass door option is available, along with other customization options based on project requirements.

Q: Is installation service available across India?

A: Yes. All-India service and installation support is available, subject to location, order specifications, and service terms.

Q: Can the sauna be customized?

A: Yes. Customization is available in sizes and selected features to suit residential or commercial wellness requirements.
