About Us

A surge has been witnessed in using Pre Engineered Buildings, Pre Engineered Warehouses and PEB Structures for warehousing purposes rather than the traditionally built buildings. Keeping this in mind, we, Industrial Roofing System, have taken upon ourselves to manufacture and supply a vast array of precision built structures for catering the diverse requirements of our esteemed clients. We began our operations in 2011 and since then we have laid importance on offering quality assured range of building structures featuring modern designs and fulfilling the precise requirements of our customers. Our provided sheds are of remarkable quality and are built in accordance with the prevailing standards of the domain. Through our persistent efforts, we have successfully obtained ISO certification to further reassure our vision to deliver excellent quality

In a bid to attain maximum customer satisfaction, we have focused heavily on maintaining high standards of quality through rigorous quality tests conducted by our dedicated team of analysts. The fabricated structures are thoroughly evaluated on numerous pre-defined parameters including strength, dimensional accuracy, finishing and durability before making the final dispatch. Quality has been of prime importance to us and we have strived hard to gain the trust of our clients by making available a broad gamut of ISO 9001:2008 certified products including PEB Structures, Aluminum Ventilators, Wind Ventilators, Roofing Ventilators, etc. The raw material used for manufacturing the provided range of products is subjected to strict quality control tests before beginning the process.

Key Fact

Nature of Business: Manufacturer and Supplier

Production Type: Semi-automatic

Year of Establishment: 2011
