

# POLYCRAFT PRESS SYSTEM

## SINGLE / MULTI DAY LIGHT HYDRAULIC PRESS SYSTEM

Heavy duty Hydraulic Press intend discontinuous panel production line to produce varies thickness sandwich panel for cladding and cold store application.

This can produce panel thickness from 25 mm to 150 mm with a max. length up to 4 Mts.

These Press Beds are manufacturing in our highly equipped workshop under strict quality control by our professional management.

**These panels can be processed in our PU presses and can be used in the following applications:**

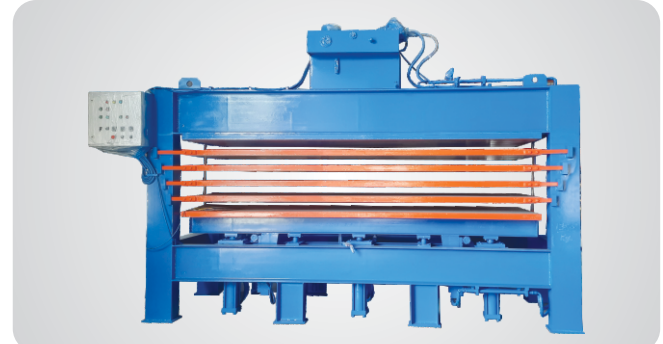

- AHU (Air handling Unit)
- Pallets

Models :

IDL/2 DL/3 DL/4 DL

Note :

We manufacturer vertical press for door foaming up to 8 day light

# POLYCRAFT PRESS SYSTEM

Heavy duty Hydraulic Press intend discontinuous panel production line to produce varies thickness sandwich panel for cladding and cold store application. This can produce panel thickness from 25 mm to 200 mm with a max. length up to 12000 mm.

These Press Beds are manufacturing in our highly equipped workshop under strict quality control by our professional management.

**These panels can be processed in our PU presses and can be used in the following applications:**

- **Cold storage rooms:** PU panel + steel or PPGI or aluminum covering sheet.

- **Refrigerator counters:** same composition as above; sometimes the surfaces are shaped.

- **Building sector:**

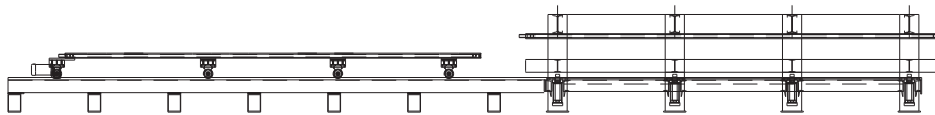

a) Industrial building walls, roofs. Panels composed by: aluminum or PPGI or steel sheet + PU panel.

b) Insulating walls, under roof insulation. Panel composed by: aluminum or PPGI or steel sheet + PU panel If the PU panel is fitted. inside the wall it can be covered just by paper.

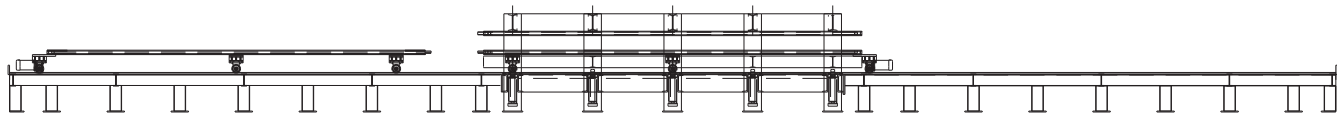

c) Doors (mainly for garages, cellars): metal sheet + PU panel & Craft paper.

**Transport sector** (refrigerator trucks, cars): aluminum sheet (more often fibreglass sheet) + PU panel.

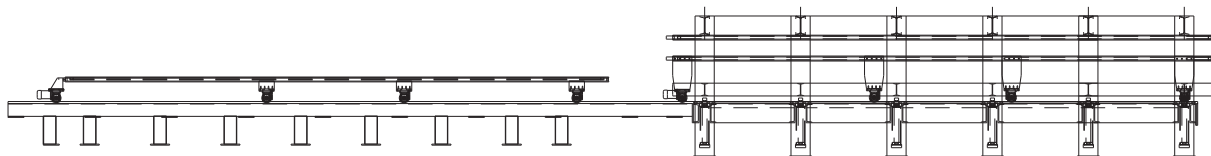

**Various:** swimming pool walls and floors, electricity substations, mattresses, dryers etc.
