

EXTRA COOLING SYSTEM

Fast Cooling - The Revolution

OPEN TYPE SCROLL CHILLING PLANT

Characteristic

Voltage: 3PH~415V~50HZ/60HZ

Refrigerant: R410a/R407c/R134a/R22

Condenser: High efficiency copper tube shell

and tube type

Description

1. Cooling range: 5 °C ~ 35 °C.

- 2. Water tank made of SUS304 stainless steel.
- 3. P.I.D temperature control, temperature control is accurate and reliable.
- 4. Using an independent anti-freezing temperature controller to prevent freezing.
- 5. Compressors and pumps are equipped with overload devices.
- 6. Low and high voltage switch control, flexible and adjustable, well protects the compressor.
- 7. Hydrophilic chip condensers to have better heat exchange effect.
- 8. Shell and tube evaporators with large heat exchange capacity and stable heat exchange effect.
- 9. Refrigerant: R22, environmentally friendly refrigerant R410A/R407c/R134a is also optional.

Application

Food and Beverages – Microbreweries, confectionary, bakeries, distilleries, wineries, bottling, corbonation, vegetable, meat and fish processing, etc.

Pharma and chemical – Jacketed vessels cooling, condenser cooling, PUF mixers, Laboratories applications, x ray spectrometers, paint cooling, packing machine, anodizing, plating, liquid nitrogen plant, etc

Plastic molding industry - The Water Chiller is to provide a cooling process for better industrial production. In plastic molding industry.

Automobile and Mechanical Engineering – machine tool, induction hardening and heating, welding machines, rolling mills, presses, cutting, profiling, polishing, electric discharge machine, hydraulic oil

cooling, heat treatment, component washing, component cooling, environmental test chambers, drive cooling, plasma spray, vacuum systems, etc.

Metal working – Water jet cutting, power press, hydraulic oil cooling, laser cutting, aluminium extrusion, precious metal processing, etc.

Paper and related – printing machine, labelling machine, cardboard making, plastic film machine, etc.

Others – textile, semiconductor, air compressor, concrete batching, dynamometer, furnace, etc.

Parameter

		High/Low Pressure protection, Phase-sequencing			
Protection Systems		Protection, Overload Protection, Overheat Protection,			
		Water flow protection, Anti-frozen protection.			

Note

- Normal conditions: Chilled water inlet temp is 12°C, outlet temp is 7°C, Cooling water inlet temp is 30°C, outlettemp35°C.
- Temperature condition: Chilled water range is 7°C--30°C, Fouling factor: 0.018m2⋅°C/KW;
- Input power:3P-380V-50HZ,Allowable punctuate voltage:±10%.Allowable voltage difference in phase:±2%
- Actual head lift is pump head lift minus the machine internal head loss(1mH2O=9.8KPa);
- The above parameters are based are Refrigerant R22, for other parameters of Refrigerant R134A,R407C ect.refrigerants, plcontact us.
- Due to technology updating, size ¶meters listed data may change; The above data's are for reference only, please feel free to contact us for the latest data.

Structural

50TON WATER COOLED SCROLL CHILLER

Characteristic

Voltage: 3PH~415V~50HZ/60HZ

Refrigerant: R410a/R407c/R134a/R22

Condenser: High efficiency copper tube shell and

tube type

Description

1. Cooling range: 5 °C ~ 35 °C.

- 2. Water tank made of SUS304 stainless steel.
- 3. P.I.D temperature control, temperature control is accurate and reliable.
- 4. Using an independent anti-freezing temperature controller to prevent freezing.
- 5. Compressors and pumps are equipped with overload devices.
- 6. Low and high voltage switch control, flexible and adjustable, well protects the compressor.
- 7. Hydrophilic chip condensers to have better heat exchange effect.
- 8. shell and tube evaporators with large heat exchange capacity and stable heat exchange effect.
- 9. Refrigerant: R22, environmentally friendly refrigerant R410A/R407c/R134a is also optional.

Application:

Food and Beverages – Microbreweries, confectionary, bakeries, distilleries, wineries, bottling, carbonation, vegetable, meat and fish processing, etc.

Pharma and chemical – Jacketed vessels cooling, condenser cooling, PUF mixers, Laboratories applications, x ray spectrometers, paint cooling, packing machine, anodizing, plating, liquid nitrogen plant, etc

Plastic molding industry - The Water Chiller is to provide a cooling process for better industrial production. In plastic molding industry.

Automobile and Mechanical Engineering – machine tool, induction hardening and heating, welding machines, rolling mills, presses, cutting, profiling, polishing, electric discharge machine, hydraulic oil cooling, heat treatment, component washing, component cooling, environmental test chambers, drive cooling, plasma spray, vacuum systems, etc.

Metal working – Water jet cutting, power press, hydraulic oil cooling, laser cutting, aluminium extrusion, precious metal processing, etc.

Paper and related – printing machine, labeling machine, cardboard making, and plastic film machine, etc. Others – textile, semiconductor, air compressor, concrete batching, dynamometer, furnace, etc.

Parameter

	Н	1900
Weight	Kg.	1550

Protection Systems

High/Low Pressure protection, Phase-sequencing Protection, Overload Protection, Overheat Protection, Water flow protection, Anti-frozen protection.

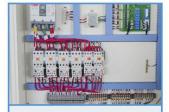

Details

Controller Panel

Ergonomic panel and automatic control. Using precise thermoelectric controller. Long-term stable operation.

Evaporator

The highly effective heat exchanger minimizes the loss of cooling capacity. It is easy to return oil. The heating pipe is prevented from frost crack.

Condenser

High efficiency, 30% higher than normal condenser; Integral design; Anti-dirty; Able to working in humid conditions Evaporator.

Compressor

Equipped with a powerful compressor imported from U.S. and Europe.

The compressor operates smoothly and quietly at high EER value.

Expansion valve

All valves adopted World-leading brand: DANFOSS/EMERSON

SROLL WATER COOLED CHILLER WITH 03 CIRCUITS

Characteristic

Voltage: 3PH~415V~50HZ/60HZ

Refrigerant: R410a/R407c/R134a/R22

Condenser: High efficiency copper tube shell and

tube type

Description

1. Cooling range: 5 °C ~ 35 °C.

- 2. Water tank made of SUS304 stainless steel.
- 3. P.I.D temperature control, temperature control is accurate and reliable.
- 4. Using an independent anti-freezing temperature controller to prevent freezing.
- 5. Compressors and pumps are equipped with overload devices.
- 6. Low and high voltage switch control, flexible and adjustable, well protects the compressor.
