

## **Khaitan Copper Winding Wire**

The Khaitan Copper Winding Wire is a superior quality product widely used in the industrial sector. Made with high-quality copper material, this red-colored wire is available in various sizes as per the requirement. The wire is known for its excellent conductivity, durability, and resistance to corrosion, making it a top choice for applications that require high electrical conductivity. Its insulation properties also make it ideal for use in motors, transformers, and other electrical devices. The wire comes with a warranty, ensuring that customers can rely on its quality for a long time.

### **FAQs of Khaitan Copper Winding Wire**

**Q:** What is the Khaitan Copper Winding Wire used for?

**A:** The Khaitan Copper Winding Wire is used in various industrial applications that require high electrical conductivity.

**Q:** What is the color of the wire?

**A:** The wire is red in color.

**Q:** What sizes are available for the wire?

**A:** The wire is available in various sizes as per the customer's requirement.

**Q:** Is the wire made with copper material?

**A:** Yes, the wire is made with high-quality copper material.

**Q:** Does the wire come with a warranty?

**A:** Yes, the wire comes with a warranty ensuring its quality and durability.
