

Electrical Zinc Oxide Plant

Product Reference Sheet

Product Name: Electrical Zinc Oxide Plant

Description: An advanced electrical zinc oxide manufacturing plant designed for efficient and continuous production of high-purity zinc oxide. The system is engineered for energy-efficient operation, consistent output, and reliable performance, making it suitable for industrial-scale manufacturing.

Key Features:

- High-efficiency electrical furnace technology
- Robust and durable construction
- Continuous production with stable performance
- Energy-efficient operation and reduced operating costs
- Integrated fume collection and emission control system
- Low maintenance and easy operation

Applications:

- Rubber Industry
- Ceramics & Glass Manufacturing
- Paints & Coatings
- Chemicals & Pharmaceuticals
- Cosmetics & Personal Care Products
