REPAIRING & TESTING PROCEDURE

At Noor Hydraulic works, we specialize in the comprehensive service, repair, and technical support of high-performance hydraulic systems. Whether it's heavy-duty mining machinery or precision industrial pumps, we ensure your equipment performs at its peak.

Our Rigorous Testing & Repair Procedure

We follow a strict protocol to ensure every unit meets factory standards:

- **Detailed Inspection:** We begin by fully disassembling the hydraulic pumps and motors to visually identify the root cause of the problem.
- **Precision Repair:** Once the issue is found, we repair the component if possible. If a repair is not feasible, we replace it with a new OEM (Original Equipment Manufacturer) part.
- **Performance Testing:** We reassemble the unit and conduct rigorous testing to ensure it operates according to its original factory specifications.
- **Quality Guarantee:** Every worn-out part is replaced so that when you receive your equipment, it performs like new.

The Apex Advantage

- **6-Month Warranty:** To ensure your complete confidence, we offer a 6-month in-service warranty on our repairs.
- **Fast Turnaround:** We promise to return a fully functioning pump or motor—typically within five days or less from the time we receive it.
- **Competitive Pricing:** You will benefit from the most competitive rates in the industry without sacrificing quality.

We Repair & Service Leading Brands:
