

PVC CLING FILM SLITTING & REWINDING MACHINE

Product Brochure

Product Description

This PVC Cling Film Slitting and Rewinding Machine is designed for smooth and efficient film cutting and rewinding. It has a strong and compact structure for regular industrial use. The machine is suitable for PVC cling film and can slit large rolls into smaller rolls of required widths. It provides easy operation with a simple control panel and adjustable settings. The roller system helps maintain smooth film movement and uniform rewinding. Its durable construction supports continuous working and consistent performance. The machine is suitable for packaging, food wrapping, and other film-processing applications where accurate slitting and neat rewinding are required.

Key Features

- Suitable for PVC cling film
- Slits large rolls into smaller required widths
- Smooth and uniform rewinding
- Compact and durable machine structure
- Simple control panel for easy operation
- Adjustable settings for different film requirements
- Suitable for packaging and food-wrapping applications

Applications

PVC cling film processing, food wrapping, packaging, and other film-converting applications where accurate slitting and neat rewinding are required.
