

RIBBON BLENDER

Uniform Mixing | Robust Construction | Efficient Operation

Product Overview

The Ribbon Blender is designed for efficient and uniform mixing of dry powders, granules and other bulk materials. Its horizontal trough with ribbon agitator provides thorough blending while maintaining reliable performance for industrial production.

Key Features

- Horizontal trough with ribbon-type agitator
- Uniform and efficient mixing performance
- Heavy-duty construction for long service life
- Gearbox-driven operation for dependable performance
- Easy loading, discharge and maintenance
- Customizable capacity and material of construction

Specifications

Parameter	Details
Product Name	Ribbon Blender
Machine Type	Horizontal Ribbon Blender
Construction	MS / Stainless Steel options
Mixing Element	Ribbon-type agitator
Drive System	Motor and gearbox driven
Operation	Batch mixing
Capacity	Customizable as per requirement
Discharge	Bottom / side discharge options
Application	Mixing powders, granules and dry bulk materials
Customization	Capacity, material and configuration as required

Applications

Suitable for food processing, pharmaceuticals, chemicals, fertilizers, animal feed, plastics, minerals and other industries requiring consistent dry-material blending.

Note: Capacity, motor power, ribbon configuration, material of construction and discharge arrangement can be customized according to the buyer's process requirements.
