Industrial Keys

TGM , manufacturing low-cost machine keys with best quality and dependability. Our machine key prices are reasonable compare other sellers.

Machine keys, also known as shaft keys, fasten shafts to gears, pulleys, couplings, wheels and similar parts. There are different types of machine keys. Parallel keys are rectangular, with their ends either square (DIN-6885-A standard), rounded (DIN-6885B standard), or square and rounded (DIN-6885-AB standard). Machine key stock lets you make your own machine keys, sawing these longer pieces into whatever size keys you need.

Our machine keys are made with SC45 carbon steel, Customer requirement alloy steel, Grade of stainless steel, Aluminum. Special tapping, drilling and heat treatment services are also available upon request. If you require a machine key size, type, or metal, please send us your desired machine key specifications with a drawing/diagram if possible and we will get back to you with a quote. Parallel keys are stocked in C45k key steel having a minimum tensile strength of 60Kg/mm² and stainless steel grade A4.
