

## AICIL DOUBLE PAN WEIGHING SCALE

Double pan weighing scale is designed to provide accurate weighing of blood bag carrier/ bucket prior to centrifugation in order to avoid imbalanced centrifugation operation. The actual Weight of the contents is displayed in real time and can be adjusted simultaneously by adding removing weights. The different weight in grams is also displayed at the time. Double Weighing scale increases the productivity in blood banks by reducing the time required during balancing before compliments separation process in blood centrifuge.

### Salient Features

- LCD Jumbo Display
- Auto calibration.
- Stainless Steel top pan.
- External power supply.
