

Making chemistry
Intelligent, efficient & responsible

BKC-50 Biocide Chemical is a highly effective antimicrobial agent designed to control and eliminate microbial growth in various applications. Featuring a broad spectrum of activity, it provides reliable protection against bacteria, fungi, and algae. This biocide is ideal for use in industrial, agricultural, and water treatment processes. Its easy-to-use formulation ensures efficient and long-lasting results. BKC-50 Biocide Chemical is essential for maintaining hygiene and preventing contamination, offering a powerful solution for diverse biocidal needs.
