

Defoamer FKA

1) Product Description

Defoamer FKA is a silicone based antifoaming agent stable to HTHP processing conditions. It is stable to high concentration of electrolyte and alkali

2) Properties

Ionic character	:	Nonionic
pH (As such)	:	6-7
App. (As such)	:	White color liq.
Solubility	:	Dispersible in water
Chemical Composition	:	Silicone based

3) Application

Dosage depends on the foaming behavior of the processing liquor. Before addition in to the processing liquor **Defoamer FKA** is diluted with 5 - 10 times with water by adding water to **Defoamer FKA** under continuous stirring

4) Safe use and handling

Good hygienic and industrial practices should be followed and, when employed as recommended, **Defoamer FKA** will not present any hazard. However, prolonged skin contact with the neat product should be avoided and any splashes on the skin should be washed off with water.

The information herein is, to the best of our knowledge, correct and complete. It is based not only on the work in our laboratory but also on the reported results of other workers in this field. It is offered without guarantee of specific properties and no patent liability is assumed. No liability can be accepted for any loss, injury or damage resulting from its use.
