

Hydro Blasting Pumps & Systems

PressureJet[™]
EXPLORE THE WATER POWER

About Company

PressureJet Systems Pvt. Ltd. was established in 1996 in Ahmedabad, India. PressureJet (an ISO 9001:2008 certified company) is a leading manufacturer of High Pressure, Positive Displacement, Reciprocating Triplex Plunger Pumps, Systems and relevant accessories. These pumps are widely used for various applications like Granite & Marble Texturing, Wet Sand Blasting, Sewer Jetting, Hydro Blasting, Water Jet Cleaning, Hydro test, Descaling, Fire Fighting, Transfer & many more.

Today, PressureJet has a workforce of more than 70 dedicated people. We have 11000 Sq. ft. area in Asia's premier industrial estate in Ahmedabad. Out of which, 5000 Sq. ft. area has been allocated for manufacturing activities.

Our Quality

All components are quality checked in the controlled environment of the QC department. We have the most modern measurement equipment such as 3D CMM (Coordinate Measuring Machine), Surface Roughness Tester, Hardness Tester etc. All components are tracked by barcode system with oracle ERP.

3D modelling is an important aid in designing the technical aspects of engineering product. Simulation can really help in making the correct design decisions during the development stage.

At PressureJet, we are using all latest Design Softwares.

Machine Shop

Our Ultra-modern machine shop enables us to manufacture an extremely wide range of components. We can be very flexible in our production planning, while maintaining a high standard of quality with fully automatic machining station. Computer controlled machining stations ensure constant dimensional accuracy.

Assembly & Testing

In this area, all components for the various pump units come together. Pumps and engine or motors are assembled on the skid frame, Accessories such as booster pump, Strainers, PRV, Safety Valve etc. are assembled.

PressureJet products are subject to stringent quality control. All pumps are tested at maximum load prior to dispatch for decided time period. All measurement taken during the testing are electronically stored in computer through fully Automatic Test Bench and then it can be printed. Test report is always provided with the pump.

Store / Service

A product is only as good as the service backing it. We have a dedicated team of technicians available for 24 X 7. We keep majority of spares Ex-stock to reduce down time.

3	PX 21.50 IR		21	1272						

HW Series Model Selection Chart

Pump Model	Flow Rate in LPM (GPM)	Pressure in Bar (Required Motor HP)
PX 15.50 IR	15(4.0)	500 (20)
PX 17.35 IR	17(4.5)	350 (15)
PX 21.50 IR	21(5.5)	500 (30)

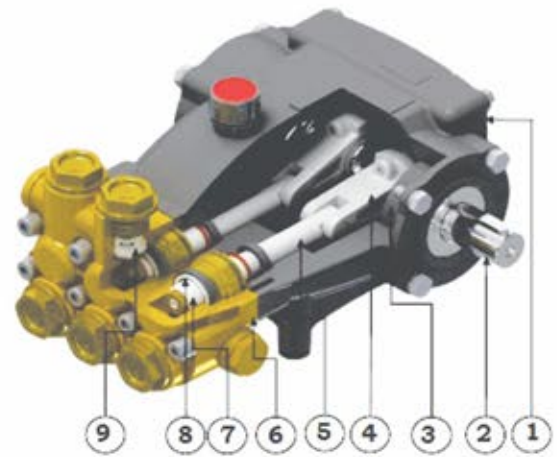

Note : (1) Flow rates indicated are at 100% volumetric efficiency. Actual flow rate will be $\geq 90\%$.

(2) All models are suitable for 50 Hz (1500RPM) and 60 Hz (1800 RPM) power specification.

Material of Construction of Major Internal Parts

- 1 Crank Case (Main Body) :**
Crank Case in High Strength Aluminum Pressure Die Casting. With fit led anti friction bush.
- 2 Crankshaft :**
Crankshaft is made of Forged Alloy Steel, with Hardened & Ground.
- 3 Bearing :**
Oversized for maximum life and load disbursement. Self-alignment roller bearing enables it to handle 26% more load than other pumps.
- 4 Connecting Rod :**
Forged Aluminum connecting rods with antifriction bearings. Heavy pin area construction, for added load strength.
- 5 Piston (Plunger Rod) :**
Stainless Steel Construction for hard surface coating and super finish.
- 6 Pump Head (Manifold Housing) :**
Pump head is made of High Strength Forged Brass.
- 7 Plunger :**
High Finish Solid Ceramic Plunger and Surface roughness is extremely good i.e. <0.25 Ra for less wear of Plunger seal.
- 8 Plunger Seal :**
Durable Fiber Impregnated Buna-n Seal packing (Make Parker, Germany) for high compressive & tensile strength ensures effective sealing.
- Complete Valve :**
- 9 Valves** made of Stainless Steel anti corrosion hard surface coated for long life. High volumetric efficiency, valves operate at more than 95% efficiency.

PB Bare Pump - Dimension

Specification

- Plunger Stroke: 40 mm
- Max. plunger speed: 1.26 m/sec. @ 950 spm
- Plunger force: 12.5 kN (1274 kgf)
- Inlet Pressure min./max.: 2-3 bar (Booster Pump flow require min. 1.5 times of rating flow)
- Oil Type: 15W 40, Oil capacity: 5 ltr.
- Max. Liquid Temp.: 70 °C (160°F)
- Discharge Connection: 1/2" BSPF
- Suction Connection: 3/4" BSPF
- Medium: Clean water
- Splash lubrication.
- Available direct couple 1000 rpm for 50Hz (Not 60Hz) or pulley – belts drives or gear box.

Material of Construction of Major Internal Parts

Power End

- 1 **Main Body (Crank Case) :**
Grey Cast Iron : Main body in grey iron casting FG-260. With Honned surface finish bore.
- 2 **Crankshaft :**
Spheroidal Graphite Iron : Crankshaft is made of nitrated, hardened and tempered Spheroidal Graphite Iron casting.
- 3 **Connecting Rod :**
Alloy Steel : Forged steel connecting rods with antifriction bearings. Heavy pin area construction, for added load strength.
- 4 **Piston (Cross Head) :**
Alloy Steel : Alloy steel construction for hard surface coating and super finish.
- 5 **Bearing :**
Oversized for maximum life and load disbursement. Self-alignment roller bearing enables it to handle 26% more load than other pumps.

PC Bare Pump - Dimension

Fluid End

- 6 **Pump Head :**
Stainless Steel : Liquid end is made of high corrosion resistant forged SS304.
- 7 **Plunger (Ceramic / Tungsten coated) :**
Primarily composed of ceramic coated or Tungsten coated. Surface roughness is extremely good i.e. <0.2 Ra.
- 8 **Complete Valve :**
Stainless Steel : Valves made stainless steel for hardened & anti corrosion hard surface coated for long life. High volumetric efficiency valves operate at 95% efficiency plus.
- 9 **Plunger Seal :**
PTFE Aramide : "V" style strong and tightens under load or Aramide fiber yarn packing for high compressive & tensile strength ensure effective sealing.
