About Us

When FARMADIL INDIA LLP observed that the rising demand for natural and organic crop farming necessitated a greater emphasis on offering an Organic solution to promote soil nutrition, we set out to create a company that would do just that manufacture, supply, and export agricultural goods. Organic Fertilizers Granules are provided by FARMADIL INDIA LLP as a chemical fertilizer substitute. Compared to chemical fertilizers, organic fertilizer granules produce more effective outcomes and make land more productive. We encourage farmers to lessen their reliance on chemical fertilizers and instead turn to organic fertilizers to ensure a brighter and healthier future.

Fertilizers in many ways promotes or enhances the growth of crops due to the presence of nutritive plant elements like nitrogen, phosphates and potassium and therefore, our aim is to make these enriched agro solutions accessible to every farmer. We keep the prices of our products low as compared to our competitors so that the farmers can easily afford and use it during the farming process. We are getting good response from our customers right from our incorporation and so we supply our products not only in India but foreign market as well.
