

10 to 320 kVA AMF Panel

Product Description: This image shows a floor-mounted Automatic Mains Failure (AMF) Panel designed for DG set automation and power backup applications. The panel features a microprocessor-based controller, analog/digital metering, selector switches, indicator lamps, emergency stop control, and a main operating handle. The enclosure has a powder-coated finish and is suitable for industrial electrical control applications.

Typical Specifications:

- Power Rating: 10 to 320 kVA
- Rated Voltage: 415V AC
- Frequency: 50 Hz
- Panel Type: Floor Mounted
- Control System: Microprocessor Based Automatic Controller
- Application: DG Set Automation for Power Backup
- Current Rating: Up to 630A
- Cabinet Material: CRCA Sheet / Mild Steel
- Surface Finish: Powder Coated
- Protection: IP42 / IP54
- Cooling: Natural Air Cooled

Note: Specifications listed above are based on the provided product information; final panel configuration may vary according to customer requirements.
