Supports multi-currency

Counts unfit & soiled notes of any conditions.

Counts bundle in 2.5 seconds

*Also available in grey colour

Experience Uninterrupted Counting

Maxsell MX600 Series Bundle Note Counter offers high-speed cum heavy-duty counting with state-of-art vacuum feed system allowing an uninterrupted counting. MX600 can handle loads of cash whether new, old or soiled currency alike.

The spindle is specially designed and located to count even misaligned bundles accurately.

Runs continuously like a workhorse

With in-built heat and dust absorbing fan & 110V transformer to operate in low voltages, it's truly a workhorse, counting any currency & denomination at 2.5s per bundle.

Batch Counting & Add Functions

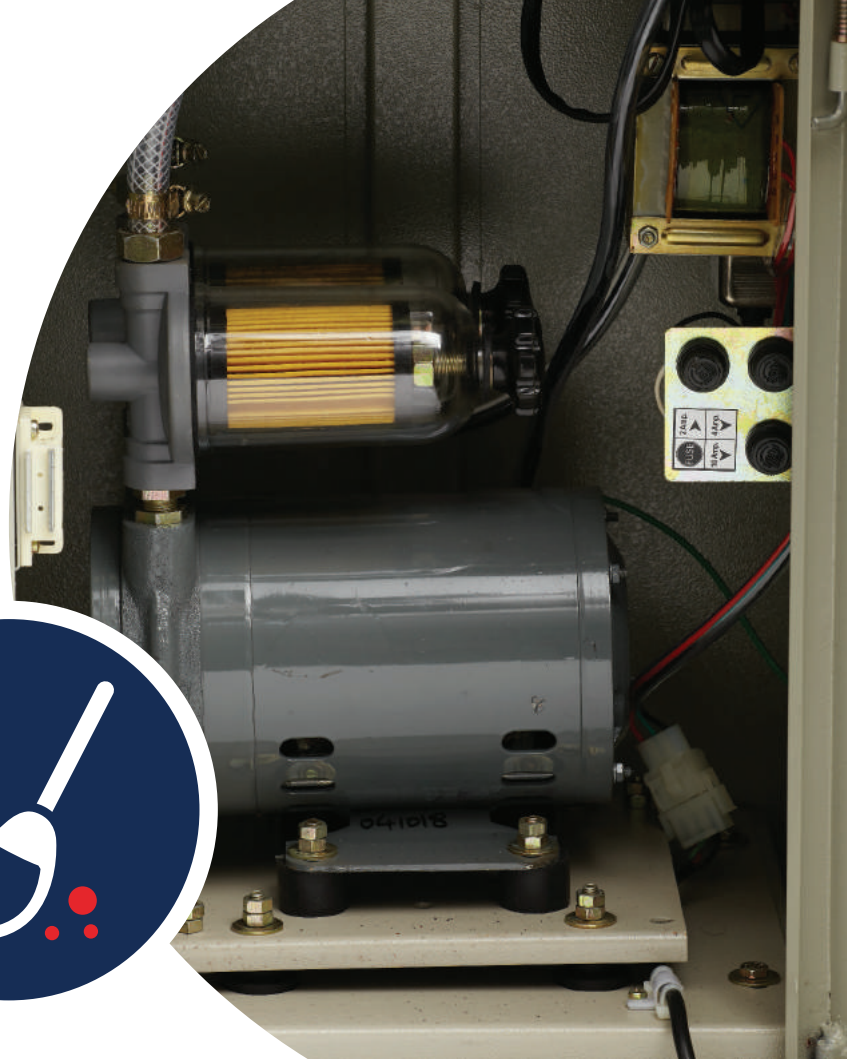

The MX600 batch counting function allows you to count your banknotes into batches. Simply input your desired batch quantity and the MX600 will automatically pause counting each time it counts that quantity. And Add function allows you to add different stacks of banknotes together. Ideal for keeping track of the total counting result across individual runs.

Easy Maintenance

The filters are located at the bottom portion of the machine covered with a door, which means the customer can themselves clean the filter periodically without having to wait for maintenance. For bulk cash handling.

MX600 Desktop is the best choice. It can operate continuously for hours together.
