MercuryCURE

SASG
UV SOLUTIONS PVT. LTD.

Our Interdeck UV System includes a wide range of uv coating attachment on offset press, uv curing attachment with offset presses, uv curing machine for offset printing machines, uv coater attachment with offset printing press, 3d uv curing machine and uv combo dryer with IR and Hot Air System.

One can attached UV interdeck with all types of offset printing machine, Rotogravure printing machine, lithrone offset printing presses.

AIR COOL:-

In air cool system we use vacuum blower. The capacity of blower will depends on the size of the uv lamp. This type of Interdeck design accordance with the blower. Use blower pipe. One inlet and one outlet blower is used inlet of the blower is connected to the Interdeck .

Features

- Auto shutter
- Hibernation mode with press
- High operational fluency
- Excellent functionality
- Smooth operation & Reliable
- Dimensionally accurate
- User friendly operation with "zero" made ready time.
- UV lamps have variable intensity as per the job

MercuryCURE

INTERDECK UV SYSTEM

Powerful Interdeck UV system of highest quality for Printing industry

WATER COOL UV INTERDECK

In the water cool UV Interdeck use chiller system. In chiller system it consist of an cooling towers, condensor, pump. The temperature and pressure of chiller is variable.

Water Distributor

- Water distributor for independent cassettes
- Easy to detect low pressure and high temperature faults
- Thermal switching for over heat detectors
- Cleaner working environment
- Easy to maintain
- Compact in size

SAFETY POINT :-

- Temperature sensor inbuilt in Interdeck for safety of UV lamp
- Blower safety
- Chiller safety
- Shutter safety by postion
- Complete panel safety
