## About

# Nisarg Polymers Pvt Ltd.

We are a dynamic team of qualified professionals committed to delivering reliable rubber products and solutions for diverse industrial applications. With a strong focus on consistent quality, fast development, quick delivery, best service and competitive pricing, we work closely with customers to meet their exact requirements.

Bhagwandas M. Prajapati  
(Founder)

Backed by our 25,000 sq. ft. manufacturing facility, we support both standard and customized developments as per samples, drawings or application needs. Our customer-first approach, strong production planning, and responsive communication help ensure dependable supply and timely dispatch.

## Vision

To be a trusted and preferred polymer manufacturing partner by delivering high-quality products, dependable service, and continuous value to customers.

## Mission

“Our mission is to deliver consistent-quality rubber products with reliable service, quick development and on-time delivery. We focus on customer requirements, process control and continuous improvement to create long-term value for our customers.”

## VALUES

**Integrity** – We do what we say, with honesty and transparency.

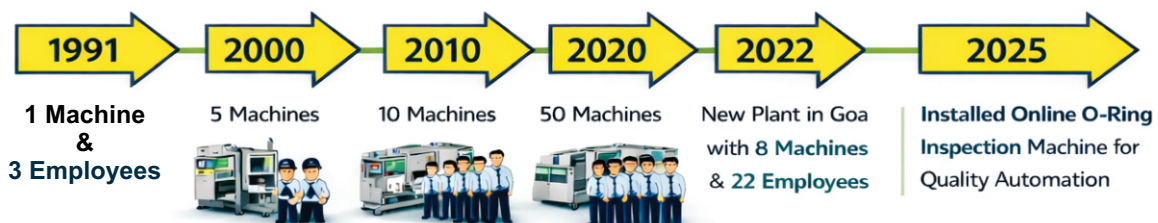

**Quality** – Consistent products and defined process control at every stage.

**Customer Commitment** – Quick response, clear communication, and dependable support.

**Continuous Improvement** – Improving processes, efficiency and product consistency every day.

**Teamwork & Respect** – Working together with responsibility and respect for people and partners.

## Our Journey of Excellence

## Zero Defect Commitment

# Why Choose Nisarg Polymers?

## Over 35 Years of Experience in Rubber Component Manufacturing

More than 35 years of expertise in producing high quality rubber

## Strong OEM Relationships

Working with over 10 leading Original Equipment Manufacturers (OEMs) in India and abroad.

## Customer-Centric Approach

Focus on tailored solutions and exceptional management practices to meet customer needs.

## Scalable Production Capacity

Expertise in low, medium, and high volume production for diverse industry requirements.

## Key Account Management Culture

Embedding KAM principles into Product Development, Business Development, & Sales functions.

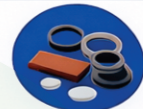

## Competitive Pricing & Rapid Development

Competitive pricing coupled with quick development timelines - to address specific customer needs.

## In-House Tool Room & Laboratory

We have an in-house tool room and rubber mixing facility, along with a well-equipped Laboratory for raw material & product validation.

## Comprehensive Product Range

A wide variety of custom rubber components including Rubber Moulded Parts, Rubber Grommets, Rubber O-Rings, Silicon Sponges, and more.

## KEY FACTS

**1991**

Year of Establishment

**Industrial**

**Automobile**

## Materials We Process

### WE PROCESS A WIDE RANGE OF ELASTOMERS, INCLUDING

- NR — Natural Rubber
- SBR — Styrene-Butadiene Rubber
- CR (Neoprene) — Chloroprene Rubber
- NBR (Buna-N) — Nitrile Rubber
- HNBR — Hydrogenated Nitrile Rubber
- EPDM — Ethylene Propylene Diene Rubber
- Silicone (VMQ) — Methyl-vinyl silicone rubber
- Silicone (Platinum)
- Fluor silicone (FVMQ)
- FKM (Viton®) — Fluor elastomer
- FFKM — Perfluoro elastomer
- ACM — Acrylic Rubber

### SPECIALITY MATERIALS WE OFFER

- Hardness range 10°Shore A to 95°Shore A
- Metal-detectable Rubber parts For Food Processing Industries
- Electrically conductive rubber Products
- Insulation Resistance Rubber Products
- High temperature-resistant compounds Up to 300°C
- Gasoline-resistant rubber products
