

**12 POINT 5/15 AMP  
SOCKET VERTICAL PDU  
WITH MCB**

## OVERVIEW

The 12 Socket 5/15 Amp PDU with 32 Amp MCB efficiently distributes power to multiple devices in a rack.

Featuring twelve 5Amp/15Amp sockets and a master on/off switch, it ensures reliable power distribution and easy control of connected equipment.

Key features include high load capacity, a 32 Amp Miniature Circuit Breaker (MCB) for superior protection against overloads and short circuits, durable construction for long-lasting performance, and a built-in indicator light for monitoring power status.

Ideal for data centers, server rooms, and network racks, this PDU ensures efficient power management and distribution, keeping your equipment protected and running smoothly

**PRODUCT DESCRIPTION :**

A vertical-mount PDU with 12 outlets for 5A/15A devices. Designed for commercial and industrial deployments, it features a 32A MCB and a status indicator for fast visual checks, plus a long input lead for flexible routing.
