Patient Safety First

HEMOSPONGE Dental Cubes

Resorbable Haemostatic Packing Sponge for Use in Dental Surgeries

Trusted by 70,000 Dentists

FEATURES

FEATURES

Fast and Effective Haemostatic

Stops oozing blood in 2-4 minutes

Excellent Packing Material

Provides physical supports and absorbs oozing blood from bleeding sockets

Highly Absorbent

Absorbs 40 to 45 times the fluid/blood
(1 gram of sponge absorbs 40 - 45 grams of blood).

3D Matrix Structure

UNIFORM POROSITY – better mechanical strength, superior absorbing power and better clot holding capacity

Pure, Safe and Biocompatible

Made up of 100% Biocompatible material – extra pure parenteral grade **GELATIN ONLY** (Tissue collagen protein).
complies biocompatibility standards - ISO 10993

Non-toxic, Non-allergic and Inert Product

No tissue interaction,
Does not interfere natural tissue healing

Resorbable (Absorbable)

Liquifies in 12-24 hours and drained slowly with salivation, 100% resorbable

Biodegradable

When implanted deeper in tissue – metabolize by proteolytic enzymes within 3-4 weeks.

Non-toxic Metabolites

The metabolites of degraded products are non-toxic and biocompatible

Keep Your Patient Smiling

No need to remove after surgery – Provides higher patient comfort – Prevents secondary bleeding

Neutral pH

Soak freely with any chemical, pharmaceutical or biologics for advanced effect

Use with Thrombin

Soak the sponge with thrombin or tranexamic acid for quick haemostasis. Soak with antibiotic – for local antiseptic effect

Size and Shape

Wide range of size and shape to suit dental, ENT and other oral surgeries.
(Available in 38 more sizes)

Dental SL

Specially developed to fit bleeding sockets

Cost Effective

10-15 INR per patient maximum

Gamma Sterile, Ready to Use

No need to sterilize the product before use.

ACCELERATES NATURAL CLOTTING PROCESS

Provides external surface to platelets to activate clotting process – no interaction with blood proteins
