About Us

A.K. Hi-Tech Engineers is an established company dealing with manufacture, supply and services of hi-tech industrial furnaces. Our company has a tradition of engineering excellence and reliability, which has offered high performance thermal processing equipments to support the various needs of contemporary industries. This has made our solutions very popular in industries dealing with metal processing, recycling, heat treatment and manufacturing where high accuracy in heating and controlled processing environment is required.

We also deal with a complete variety of industrial furnaces and thermal equipment that is constructed in such a way that they are durable, efficient, and with uniform performance. We have Lead Rotary Furnace, Horizontal Sealed Retort Furnace, Roller Tube Furnace, Electric Chamber Furnace, and Industrial Aluminium Melting Furnace in our product line. Such machines are designed to accommodate a number of heating and melting tasks that are needed in the industrial procedures. Our furnaces are constructed using, highly-developed components and quality materials to achieve the ability to control the temperature effectively, evenly distribute the heat and achieve a long life-span. They are valued because of their robust construction, energy-saving features and ease of use, which make them appropriate to be used in the industry on a continuous basis.
