

Krishna Chemicals is a prominent Industrial Chemical Manufacturer, Exporter, and Supplier in India.late.

Krishna Chemicals

Company Profile

Krishna Chemicals was established decades back in 1983. Since then, the company is facilitating global Chemical Industry from base in Ahmedabad, Gujarat. We have achieved several milestones under the expert guidance of **Mr. Mehul Shah**, CEO of the company. We are counted among the top Chemicals Manufacturer, Suppliers, and Exporters in India. We are an ISO 9001:2008 Certified Company and we also have DUNS Registration.

Our Aim :

We aim to touch the pinnacle of success by offering finest range of Chemicals like Sodium Propionate, Potassium Acetate and adapting to constantly changing market orientations. We welcome improvements in the existing product range, thereby developing our stand among the leaders in terms of quality, delivery, and cost competitiveness.

Our Infrastructure :

Our state of the art production facilities, vanguard technology, advanced manufacturing methodologies and skilled work force create sturdy infrastructural base for the company. Our team of professionals comprises of Chemists, Pharmacists and other allied workers. We have a manufacturing capacity of around 3600 MTPA.

Our Warehouse :

To meet small as well as bulk orders, we are backed by a spacious warehouse. Our huge warehouse is well furnished with all the essential facilities such as optimum temperature and moisture level, to provide a favorable environment to the chemicals.

Manufacturer, Exporter & Supplier

Products

Calcium Acetate

We are Calcium Acetate Manufacturers, which is widely used in the treatment of Kidney Diseases, is one of the basic products we manufacture and export. Calcium Acetate Monohydrate, Calcium Formate we provide has the density of approx 1.60 kg/liter. Calcium Acetate Powder is white in color, soluble in water and has acidity of pH: 7 – 8. Calcium Acetate is used as a food additive, stabilizer, buffer, and sequesterant, mainly in candy products.

Packaging Details :

25/50 Kg Bags

Applications :

- Dyeing
- Textiles
- Lubricants
- Corrosive Inhibitor

Sodium Acetate

The anhydrous Sodium Acetate is traditionally used in various industries such as food, cosmetic, plastic, petroleum, medical & pharmaceutical as a buffering agent. Apart from the above mentioned uses, sodium acetate is also widely used in electroplating as an agent, tanning industry as a washing salt and photography to decelerate the color photographs. The multipurpose Sodium Acetate Solution is also helpful in controlling the pH level of the food items. We are leading Industrial Chemical Supplier in India. Our Anhydrous Sodium Acetate is prepared under safe conditions to assure high quality and purity. Every Bag of Sodium Acetate Concentrates is packed by our quality assurance system.

Applications :

- Textiles
- Pharmaceuticals
- Dyestuff

Packaging Details :

25/50 Kg Bags

Products

Potassium Acetate

Today, we are counted among the topnotch Potassium Acetate Manufacturers in the national and international markets. The Potassium Acetate is widely used in fire extinguishers and as a food additive. Crystalline Potassium Acetate is also utilized in mixtures for tissue preservation and fixation. Our Potassium Acetate is an outcome of multi level processing to ensure the finest quality of end product. We are considered as a leading chemical supplier in India, also offering Potassium Formate. The product is well packed and is available at reasonable prices.

Packaging Details :

25 Kg Bags/ 250 Kg
Plastic Drums

Applications :

- Drilling
- Pharmaceuticals
- Dyestuff

Calcium Formate

We bring forth carefully manufactured Calcium Formate in the domestic as well as international markets. Our Calcium Formate is composed under extremely hygienic conditions under the supervision of experts. We are one of the reliable Manufacturers, Suppliers, and Exporters of chemical like Calcium Formate and Potassium Formate in India. The product is made available at market leading prices.

Packaging Details :

25 Kg Bags

Applications :

- Leather Industries
- Food Industries

Products

Potassium Formate

In the chemical industry, we are reckoned among the top-notch Industrial Chemical Supplier and Potassium Formate Liquid Manufacturers. The Potassium Formate is extensively used in analytical chemistry to precipitate base metals from salts of the noble metals soluble. Our Potassium Formate and Sodium Propionate are well packed keeping in view the safety of the user. The Potassium Formate Solution is available in various packing ranges as per clients' demands.

Packaging Details :

25 Kg Bags/ 250 Kg
Plastic Drums

Applications :

- Leather Industries
- Food Industries

Sodium Formate

We are counted among the major Sodium Formate Manufacturers in Ahmedabad, Gujarat. Sodium Formate is used in various fabric dyeing and printing processes. The product is also used as a buffering agents for strong mineral acids to increase their pH. Sodium Propionate, Sodium Formate Powder, we provide has the density of approx 1.92 kg/liter. Sodium formate, HCOONa , is the sodium salt of formic acid. HCOOH and usually appears as a white deliquescent powder.

Packaging Details :

25 Kg Bags

Applications :

- Leather Industries
- Food Industries

Products

Calcium Propionate

Our constant endeavor to serve our client base satisfactorily has placed us among the leading White Calcium Propionate Manufacturers and Suppliers. The Calcium Propionate is used as a preservative in wide variety of products such as bread, baked goods, processed meat, etc. Our Potassium Formate, Calcium Propionate Powder is processed with advanced technology to ensure high quality final product. We provide Calcium Propionate at reasonable prices in standard and customizable packing sizes

Packaging Details :

20/25 Kg Bags

Applications :

- Pharmaceuticals Industries
- Food Industries

Sodium Propionate

We are a renowned Sodium Propionate Chemical Supplier from India. Our high quality Sodium Propionate is widely used as a mold inhibitor in bakery products. Chloride-Sodium Propionate we provide is soluble in water and alcohol. Sodium Propionate is the sodium salt of Propionic acid. Sodium Propionate and Calcium Formate, we offer, is the pure form of Off White Crystalline Powder and is tested strictly with 99.88% on Dried Base.

Packaging Details :

20/25 Kg Bags

Applications :

- Heavy Metal Industries
- Food Industries

Products

Methyl Salicylate

We are a leading Methyl Salicylate Manufacturers from Gujarat, India. We synthesize the Chemical Methyl Salicylate by etherifying salicylic acid with methanol. Methyl Salicylate offered by us is widely used in Methyl Salicylate is added in small amounts to glacial acetic acid to lower its freezing point while traveling in cold countries. The Chemical Methyl Salicylate we provide is colorless or light pale yellow liquid with basic density of 5.2 kg/liter. Methyl Salicylate manufactured by us is sparingly soluble in water. We are also manufacturers of Calcium Acetate and Anhydrous Sodium Acetate.

Packaging Details :

25/35/50/250 KG
Plastic Drum

Applications :

- Pharmaceutical Industry
