About Us

Swaraj Secutech Private Limited, got registered excellently in Ahmedabad, Gujarat and is well promoted by an experienced team of security professionals who strongly believe in Purna Swaraj, meaning from within. We are immensely happy to talk about our professional competency as well as integrity, which is unshakeable. Our strong vision is perfectly shared by an excellently self-driven group of Armed Forces veterans as well as super motivated and experienced team of engineers and professionals with high focus on R&D as well as after sales services.

We are huge proud in coming across as the very first business unit in India to have well designed and made Crash Bollards, which have been physically crash tested at HORIBA MIRA, UK. The tests were perfectly carried out as per the newest IWA 14:2013 std, well impacting 7.2ton truck @ 48kmph (K4) as well as 7.2ton truck@ 80kmph(K12) for hydraulic bollards. Our superior quality fixed bollards with only around 125 mm foundation comes across as one of the shallowest in the big world and has been excellently tested against the similar truck @ 48 kmph (K4). All possess less than 1m (P1) penetration. Our excellent logo indicates our powerful belief. An immensely progressive business entity, moving forward without forgetting our strong roots, denoted excellently by color of our logo wings. The most important thing is that we do not forget the very reason of our business existence. It is you, our very lovely customers, supremely denoted by the super glowing orange dot of our logo, to which we stay excellently committed for after sales service of today as well as coming tomorrow.
