About Us

Supertech Concrete Solutions, as the name implies, is a solution providing company which is famous all across India for its cost effective end-to-end industrial solutions ranging from **Cement Concrete Flooring Services, Industrial Floor Repair Services to Concrete Densification Flooring Services, Industrial Concrete Polishing Services** and many more. All these concrete floor related services are widely provided to customers for residential areas, commercial buildings, offices, colleges, warehouses, malls and various other places. For providing excellent retroplating, polishing, densification, repairing and coating services, we have hired a team of skilled engineers, labors, workers and project managers who all work together to complete the undertaken projects efficiently.

Being a noted **Service Provider**, we ensure that highest standards are maintained while rendering the solutions so that we can meet the exact requirements of the clients. Besides the services, we as a **manufacturer** also provide **Industrial Chemicals like Liquid Lithium Silicate, Floor Hardner Powder, Liquid Hardener And Densifier**, etc. For manufacturing the chemicals and rendering best solutions, we make use of modern machines and techniques that help us match expectations of the customers and stay ahead in the competition.

Serving Since 2014

Since 2014, our solution providing company has been catering to the requirements of several industries and aim to serve the international companies as well in the future. Within few years of our formation, we have won several hearts with our tremendous products and solutions. Both are provided to the customers keeping in mind their specific needs which make us their favorite choice. Our flexible solutions of Industrial Floor Repair Services, Industrial Concrete Polishing Services, Concrete Densification Flooring Services, etc. allow us to become a preferable name in the market. Further, the experience we have gained over the years are properly utilized by us along with the optimum usage of available resources.
