CLASSY SANITARYWARES

ELEGANCE & WELL-BEING

"I PAINT WITH SHAPES."

A PURE GEOMETRY

Creation comes in many
shapes and forms.

Art arises when the secret
vision of the artist and the
manifestation of
nature agree to find

NEW SHAPES.

CLAY
CLASSY SANITARYWARES
ELEGANCE & WELL-BEING

WE ARE CLASSY

WE ARE DESIGNER

A lifestyle, a way of being. That's CLASSY. Designed by and for dynamic people, innovators, curious types... like you, who enjoy style, and demand the best quality in everything around you.

DESIGN, DESIGN, DESIGN!

Design culture is the key to our success. This is what pushes us to create new collections that give spaces a new dimension. We create dialogue between environment and form. CLASSY collection transform the simplest bathroom space into an ambience. This is what it's all about, creating atmospheres where we can take hold of life and feel that we are here to live it, enjoy it and surround ourselves with beauty of water.

OUR DESIGNERS

Classy purely believes in design culture, where artist comes from different backgrounds, showing their inspiration from different cultures and traditions, giving their interpretations of ceramic bathware designs. Their inspiration and passion are the shapes they built in. They transform each piece of sanitary-ware into an exclusive CLASSY STYLE STATEMENT.

SPREADING DESIGN ALL OVER

At Classy, we research and innovate to develop high precision technology and create more sustainable materials. We create leading-edge products, by combining innovative solutions and excellence in terms of aesthetics and functionality. Our range is developed by soft moulded shapes that slenders its impressive volumes. Its Basins, whether table top, wall hung or with pedestal and with Ewc, whether wall hung or floor mounted, all have upto date dimensions, easily adoptable to modern and classic ambience and have lovely ceramic gloss finishes.

SELECTING THE EARTH

Using the high quality ceramic as a small portion or powder and not as a solid piece means protecting resources. Ceramic stones are seamlessly joined together in order to achieve perfect grain patterns.

WE ARE CLASSY, WE ARE DESIGNER.

"DESIGN IS A JOURNEY OF DISCOVERY."

"ORIGINALITY CONSISTS
IN RETURNING TO THE ORIGIN." – Antoni Gaudi.

CLASY
CLASSY SANITARYWARES
ELEGANCE & WELL-BEING

"SHAPE OF INSPIRATION"

MORE THAN JUST A BATHROOM

MATERIAL

Our mother Earth is rich with many types of ceramic clay. We select the best quality raw material to ensure the making of flawless surface, sturdiness, durability. Working with ceramic does not mean solely giving shape to the material, it also means working on colours and textures to obtain ever new and striking effects.

FINISHING BY HAND

Classy believes in handmade working tradition. Leaving the confidence of a design which was considered unchanging because perfect in its shape, CLASSY dares to move beyond usual and strengthened, crushing the shape of Bathwares, again maintaining its perfect elegance. To ensure the perfection, our expertise examine each masterpiece manually by hand. We simply give shape - a proper shape to the creativity of the designer, in terms of aesthetics and functional potential of ceramic material.

CLASSY STORY

As an Indian manufacturer of bathware and accessories, CLASSY evokes craftsmanship and inhouse factory set up at high end level. We have been imagining, designing and manufacturing our product since 2010. Since then, Classy has been enhancing bathware designs with its know how and unique expertise. Today the brand is exposing its bathware designs world wide in all types of environment- hotel, spa and private residency.

BE YOUR BATHROOM DESIGNER

Classy invites you to be your own designer. Different sized toilets, washbasins, above counter and built-in Basins or pedestal or with EWC wall-mounted or floor standing with ceramic glossy finish— everything is perfectly harmonized. Our creation allows the users to enjoy their private wellness on daily basis. In this brochure, We have come up with wide range of style and functionality allowing unlimited freedom and passion in designing bathroom.

WE BELIEVE IN DESIGN THAT
IMPROVES PEOPLE'S LIFE

FORM, FUNCTION, QUALITY. Perfection comes from craftsmanship. People are able to create things that even the most sophisticated technology cannot. The best designers had an eye for it _ as humans we like clear, tidy shapes, that gives every bathroom, a story to tell. For this reason we have a clear and simple language of forms and it functions carefully.

FORMS AND
FUNCTIONS SIMPLY
MERGE TO CREATE
SINGLE ENTITIY.

MAKING DESIGN TO ITS SIMPLE FORM, that's where the difficulty lies. Making something simple or reducing it to the point at which its essence is exposed. We work down to the finest detail, but we do not highlight it. At CLASSY, quality and function come first. This is how a bathroom becomes a personal living space. Every product is tailor made, that is customized to meet your desire and needs.

COMBINING ART

WALL HUNG BASIN | PEDESTAL BASIN | TABLE TOP
WALL HUNG EWC | ONE PIECE

Refreshing doesn't just mean cleaning the body. It also means nourishing the mind and soul. The ritual is expressed through all five senses: taste, colour, smell, touch, the sound made by giggling water, gentle or rapid flow of a water. Sharing together, talking and listening around the bathroom changes perspectives.

WALL HUNG | PEDESTAL | TABLE TOP

Conversation follows and the senses take over.

You can look with your eyes, The Basin continually show us a new conversation between water and sculptural forms, varying proportions. Exciting rhythms constantly develop and evolve. Only a design with lasting meaning can produce such a visual melody.

BASIN Design

WHAT BASIN REALLY ARE ?

BASIN is a bowl-shaped designed fixture and part of every home bathroom. A wash stand in a bathroom following the early English tradition.

What do you think of when you hear the word CERAMIC ?

The word "ceramic" comes from the Greek word keramikos. Ceramic have an important role in understanding the culture, technology and behavior of peoples of the past. Ceramic materials are brittle, hard, strong in compression, weak in shearing and tension.

What do you think when u design basin ?

LUXURY - ELEGANCE - DESIGNS.

We define the qualitative and creative standards.

What kinds of basins do you design ?

We design Wall hung basins, Table top basins, and Pedestal basins.

What do you think when you are designing ?

We think, we are designing by and for dynamic people, innovators, curious types... like you, who enjoy fashion and trends, and demand the best quality in everything around them.

What do you have to say about the environment ?

We design keeping safety of environment.

NIDDLE LIKE SHARP AND SLIM

DESIGN EWC

LIGHTNESS OF TOUCH

WALL HUNG | FLOOR MOUNT | ONE PIECE | URINAL | PAN

Finely designed forms meet the excellence of a vibrant ceramics tradition of exciting styling and technological innovation. They blend into any bathroom, that makes sanitary fittings genuine interior design feature.

APPROACHING CLASSY
DESIGNERS / VIEWPOINT

EWC Design

What is exactly EWC ?

A part of every day bathroom, consisting of a large bowl connected to a system for flushing away. A geometry worldwide perceived and recognized as absolute, a symbol of life and perfection.

What are the Categories ?

We have design Wall Hung EWC, Floor mounted, and also One piece toilet. High Precision, functional style.

How important is the colour ?

All colours are beautiful but it's also true to say that some colour like white suits more than others.

Rimless EWC

EASY CLEANING - PERFECT HYGIENE - ECO FRIENDLY

What is Rimless technology ?

Rimless gives a smooth surface compared to other WC. Here, the inner surface channel is removed, providing a hygienic environment and easy cleaning.

Saving Water is what u keep in mind while designing ?

Classy water efficient toilet suites are designed with a coupled cistern and integral trap to achieve effective flush using reduced volume of water per flush.

Does flushing save the water?

Yes Absolutely. We have Siphonic Flushing system, as soon as the bowl get empty, air entered the siphon tube, producing that distinctive gurgling sound and stopping the siphoning process. You can see that, even if someone were to cut off the water to your bathroom, you could still flush the toilet.

ITS ALL IN MEASUREMENTS

wellness dimensions

INSTALLATION

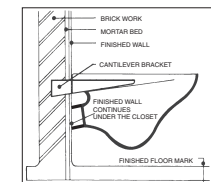

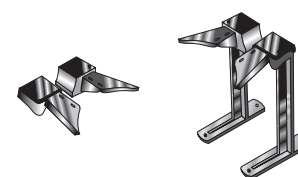

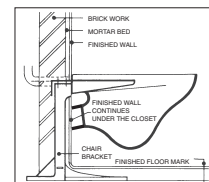

WALL HUNG BASIN

Fixing: The rag bolt should be first grouted into the wall using cement / concrete, (as shown) as per distance between slots provided in the wash basin. The bolts should be fixed perpendicular to the wall. Allow cement / concrete to set. Check if the Rag bolts are firmly fixed. Fix the Wash Basin in the bolt using Nut & Washer.

SPICE WALL HUNG

1. A cast-iron chair bracket grouted into the wall and the floor is recommended for use while installing Silware Wallvit Pan.
2. Cantilever brackets with provision of 4" of the brackets into the wall can also be used.
3. The cantilever brackets used should have the distance between the center of the back and front slots as 95 mm.
4. Ensure that while grouting the cantilever brackets into the wall, they are fixed in exactly the same plane. A distance of 180 mm between centers of the slots of one bracket to the centers of the slots to the other brackets has to be maintained while grouting the brackets.
5. For either type of fixing, please ensure that a rubber gasket is fitted between the bracket and the closet to provide adequate cushioning and protection from direct contact between the ceramic closet and metal brackets.

'S' Trap

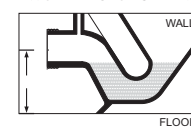

EWC TRAP SECTIONAL VIEW

The outlet (trap) of the water closet goes into the floor.

'P' Trap

EWC TRAP SECTIONAL VIEW

The outlet (trap) of the water closet goes into the wall.

Toilet Paper Test

The closet shall be filled with water to its normal water seal level and charged with six pieces of usual toilet paper or polyethylene sheet of 0.05 mm thickness approximately 150 mm x 115 mm in size and loosely crumpled. It shall then be flushed. This test shall be repeated four times and the pan shall discharge the full charge of paper at least thrice out of four times.

Smudge Test

The whole of the interior surface of the closet to 40 mm below the flushing rim shall be smudged with quartz powder of contrasting colour passing through 118 mm IS sieve and shall then be flushed, carefully observing the surface of the closet during the flushing. Immediately after the flushing, there shall be no smudge left on the bowl.

Single Ball Test

The ball shall be made of non-absorbent material. The relative density of the ball shall be between 1.075 and 1.080. The diameter of the ball shall be 43 ± 0.5 mm. Place the ball into the closet to be tested and then flush the closet. The ball shall be discharged in the normal manner.

Fifty Ball Test

Fifty ball of non-absorbent material, having a mass each of 3.7 ± 0.1 g, and a diameter of 20 ± 0.1 mm shall be dropped into the water closet bowl and flushed. Repeat the test five times. A minimum of 85 percent of all ball should be flushed out in the five tests.

INSTALLATION

MAINTENANCE

A few minutes everyday... and a beautiful bathroom forever. Like any other part of your house, the bathroom can be made to look great and made to last if it is taken care of regularly. Here are some simple tips that can help you keep your bathroom space and span.

Wash Basin

The wash basin needs to be washed with a mild detergent at least once a day. After washing, the basin must be wiped dry to avoid water stains, especially on dark colours.

Closets

Use a plastic bristled brush with a plastic handle to scrub the toilet with a cleanser like Harpic, at least once a day.

After flushing the toilet, give it a "once over" with the brush to avoid minute discoloring.

Keep the toilet brush handy in a convenient stand/ cover nearby.

In the case of Vitreous China Sanitaryware like Silware toilets and basins, if there has been no maintenance over a long period of time, water deposits and discoloration can form on the surface of areas that get wet. In such cases, these stains/ marks can be removed with the help of a solution of dilute hydrochloric acid.

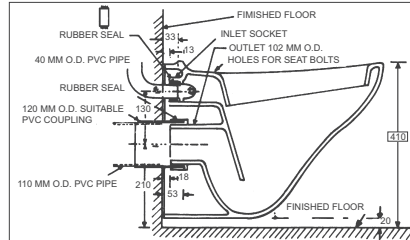

Clean with a soft cloth and warm soapy water.

Use a liquid cleaner at least once a week. Do not use powder paste, thinner or dry cleaning liquids.

To remove fine scratches, use Brasso or car rubbing compound and then polish with a polish cloth.

CONCEALED WALL HUNG

1. If the wall is going to be plastered for a thickness of 12 mm and a tile thickness of 6-7 mm, the projection of the bolts from the finished wall should be 66 mm only.
2. If the thickness of plastering and tile is less than the dimensions mentioned above, the bolts that are supplied along with the bracket should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.
3. The bracket should be buried into the floor so that the height from the center line of the bolt to the surface of the finished floor is 320 mm.

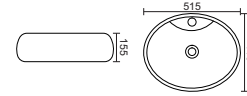

INSTALLATION & MAINTENANCE TIPS

1. Use C.I. Brackets with rag bolts to install Wash Basin with or without pedestal. If Wash Basin is large in size than it is recommended to install on pedestal screwed to the floor.
2. All Wall Mounting E.W.C. to be installed with the help of C.I. Chair bracket as well as with heavy duty rag bolt with cap and rubber bush and outlet coupler.
3. All Floor Mounting E.W.C. to be fixed on the floor with help of Screwed and do not use Cement at the hollow portion of E.W.C.
4. It is recommended to clean regular with dry cloth/ Mild Detergent to avoid stain & if required, diluted Hydrochloric acid may be used.
5. Do not use hard bristled / wire brush for cleaning to avoid scratches on wares.
