About Us

The name HV Engineering has become a symbol of trust because of our excellency in manufacturing an extensive array of material handling and storage equipment such as Curve Roller Conveyor, MS Work Bench Pipe, Ball Conveyor, Palletized Rack, etc. The sole objective of our company is to fabricate products by making optimum use of all the resources available to us. To fulfill the requirements of our customers, we also customize our offerings as per their specifications. Supported by technologically advanced equipment and skilled workforce, we are confident to handle all types of challenging projects. Moreover, we maintain cordial relations with our customers to understand their requirements and then suffice them accordingly. Thus, building long-lasting relations with them. Our modern manufacturing system enables us in upgrading and customizing our offerings without compromising the quality of our offerings. Besides, our facility also enables us in achieving cost competitiveness. Hence, making us one of the best manufacturers in this business line.

Our Vision & Mission

We emerged in the market with a vision of creating distinct value orientation for developing quality-assured range of products at competitive prices. We also keep a vigil eye over all the processes to ensure that no compromise is made on quality. We aim to become the most versatile manufacturers of material handling equipment.

The main mission of our company is to believe in customer driven designs for meeting the specific requirements of our esteemed customers. Thus, enabling us to achieve customer satisfaction through excellent product services and products like MS Work Bench Pipe, Ball Conveyor, etc.

Our Team

Under the guidance of our proprietor, Mr. Hiren Chauhan, our employees have been attaining their set targets on-time without getting their work quality being compromised. We proudly say that our team is one of the most valuable assets of our company with the support of which we are making a big name in the market.
