Rain Gun Sprinklers for Irrigation

**OUR
PRODUCT
RANGE**

Dust Suppression Spray Nozzles

Other Mechanical Items in our supply range

Our Services

A To Z Design Engineering Solution for Industrial Dust Pollution Control Systems (Including Design, Engineering & Supply of required equipments)

Systems we provide:

- **Dry Fog Dust Suppression System (DFDS)** – compressed air and water operated pollution control system – auto and manual both options available
- **High Pressure Fog Dust Suppression System (HPDS)** – clear water operated pollution control system – auto and manual both options available
- **Plain water dust suppression system (DSS)** for belt conv. Tr. Points
- **Plain Water Dust Suppression System** for stock piles and stock yards –with high capacity sprinklers –both auto/manual mode are available
- **Service Water System (SWS)** – for plant cleaning – conveyor galleries, junction house floor washing system
- **Service Air System (SAS)** – for plant cleaning– conveyor galleries, junction house floor washing system
- **Drinking Water System (DWS) / Potable Water System (PWS)** as per national building code–for transfer towers, control rooms and toilets and bathrooms
- **Fog cannon dust suppression system with anti-smog guns**, auto and manual all models available.
- **Design Engineering and supply** of all types of modernized Fountains
- **Ring fountains, ball fountains with RGB lights and music** complete with control panel available

Make you plant zero dust area

All spares for our systems are available with us

- **Fire Detection and Alarm System (FDA)** with complete fire protection system
- **Electrically Operated Automatic High Range Sirens** for plants 10km /16km / 25km / 50km range available with us
- **Dust Extraction System (DE)** for material handling plants – complete with bagfilter, centrifugal fans, ducting and supports all spares (DE)
- **Mist Spray Dust Suppression System (MSDS)** for material handling plants and special mist spray system for crusher plants are available with us
- **Instrument Air Piping System** with all equipment design are completely done by us
- **Complete Design Engineering and supply of rain gun/sprinkler operated dust suppression system** for plant haul roads – Auto / manual available
- **Complete Design Engineering and supply of rain gun / sprinkler dust suppression system** for irrigation available with us
- **Complete Design Engineering and supply of rain gun/sprinkler dust suppression system** for railway shades and plant peripheral wall boundary available

We like to work with you for making your plant a zero dust area.

Call or email us with your enquiry.

~ Who we are ~

We like to introduce ourselves as an Engineering organization involved in Design Engineering and manufacturing, supply with supervision of erection commissioning of all types of industrial dust pollution control systems for all types of material handling plants and associated equipments and spray nozzles, sprinklers, rain guns etc.

We at GREENSHIFT TECHNOLOGIES have our own Engineering team with very rich experience of executing complete industrial pollution control system projects as per client specific requirements.

We have experienced Engineers for complete site supervision of erection commissioning of complete system as per approved design and drawings.

Moreover we are dedicated to provide the industry long lasting dust pollution control systems and its accessories at most economic prices.

We have developed our team to work as an unit for executing big pollution control system project design engineering and supply along with complete erection commissioning job with the motto of providing "BEST QUALITY DUST POLLUTION CONTROL SYSTEM IN MOST ECONOMIC PRICE".

Greenshift Technologies is now approved vendor of National Thermal Power Corporation (NTPC) & Damodar Valley Corporation (DVC) and
