

# Pneumatic Actuated Industrial Valve

High Performance Flow Control Solution

ANGLE 3 - TOP ANGLE VIEW

ANGLE 4 - REAR VIEW

This pneumatic actuated industrial valve is designed for accurate control of air, dust, and bulk material flow. It is widely used in industries such as cement plants, power plants, and material handling systems. The valve ensures leak-proof performance, durability, and smooth operation in tough industrial environments.

Parameter	Specification
Type	Pneumatic Actuated Valve
Material	Mild Steel / Stainless Steel
Application	Dust & Bulk Material Handling
Pressure	Up to 10 Bar

Temperature	Up to 200°C
Actuation	Pneumatic Cylinder
Connection	Flanged
Size	DN100 – DN400

**Key Features:**

- Heavy Duty Construction
- Leak Proof Design
- Low Maintenance
- Fast Pneumatic Operation
- Long Service Life

**Applications:**

- Cement Industry
- Power Plants
- Steel Plants
- Dust Collection Systems
- Bulk Material Handling
