

Ash Intake Valve

Industrial Pneumatic Actuated Valve for Ash Handling Systems

Ash Intake Valve is designed for efficient handling of ash, dust, and bulk materials in industrial applications. It is widely used in power plants, cement plants, and dust collection systems. The valve ensures smooth flow control, leak-proof sealing, and reliable operation under harsh conditions.

Parameter	Specification
Type	Pneumatic Actuated Valve
Structure	Flanged / Slide Gate
Material	Mild Steel / Stainless Steel
Media	Ash, Dust, Powder
Pressure	Up to 10 Bar
Temperature	Up to 200°C
Actuation	Pneumatic Cylinder
Connection	Flanged End
Size	DN100 – DN400
Finish	Industrial Coating

Key Features:

- Heavy Duty Construction
- Leak Proof Design
- Low Maintenance
- High Performance in Dust Handling
- Easy Installation
- Long Service Life

Applications:

- Power Plants
- Cement Industry
- Steel Plants
- Dust Collection Systems
- Bulk Material Handling
