

Industrial Chute Valve / Lump Breaker

Heavy Duty Material Handling & Size Reduction Solution

This industrial chute valve / lump breaker is designed for handling bulk materials and breaking large lumps into smaller sizes for smooth processing. It is widely used in cement plants, power plants, and material handling systems. The machine ensures efficient flow control and prevents blockages in pipelines and chutes.

Parameter	Specification
Type	Chute Valve / Lump Breaker
Material	Mild Steel / Stainless Steel
Application	Bulk Material Handling
Capacity	Customizable
Drive Type	Motor Driven
Connection	Flanged
Size	As per requirement
Finish	Industrial Coating

Key Features:

- Heavy Duty Construction
- Efficient Lump Breaking

- Smooth Material Flow
- Low Maintenance
- Long Service Life

Applications:

- Cement Industry
- Power Plants
- Steel Plants
- Mining Industry
- Bulk Material Handling
