

This industrial gearbox is designed for efficient speed reduction and high torque transmission. It is widely used in cooling towers, conveyors, and industrial machinery. Built with heavy-duty materials, it ensures durability, low maintenance, and smooth performance in tough environments.

Parameter	Specification
Type	Industrial Gearbox
Material	Cast Iron / Alloy Steel
Gear Type	Helical / Bevel
Power Range	1 HP – 100 HP
Output Speed	10 – 150 RPM

Efficiency	90% – 95%
Mounting	Foot / Flange Mounted

Key Features:

- High Torque Output
- Low Noise Operation
- Energy Efficient
- Heavy Duty Construction
- Long Service Life

Applications:

- Cooling Towers
- Cement Plants
- Power Plants
- Material Handling Systems
- Industrial Machinery
